Message of Rector, IIUI

Islamic International University Islamabad along with other higher education institutions of Pakistan and the world has gone through hard and challenging times in the wake of the COVID-19 pandemic. This challenge came with lots of opportunities for the higher education as it helped us create an alternative knowledge platform. We had been working hard to transform our system of education in the light of the HEC's guidelines. I would like to congratulate our team of faculty members especially the Department of Education for their untiring efforts in fulfilling the huge responsibility of transforming the delivery of education from the face-to-face to online mode.

Alhamdulillah! We have successfully implemented the online LMS system as envisioned by the HEC as the Fall-2020 semester has completed. I am truly delighted to know that the Department of Education, Faculty of Social Science, is organizing its 3rd International Conference on Innovation in Teaching and Learning (ICITL-2020) particularly given the hard times we have had and continue to have. I am happy to see the conference themes that are set around the most pertinent issues being faced in the field of education in Pakistan. This has been my belief that a university is a place where knowledge is not only exchanged but also created and shared for which organizing conferences, seminars, symposia, workshops etc. are vital. I have been attending conferences and other academic programs of the Department of Education and I am happy to say that the Department of Education has been actively pursuing the path of creating and sharing knowledge. I welcome all the contributors and participants of the conference and wish them the very best.

Prof. Dr. Masoom Yasinzai

Rector, International Islamic University Islamabad

Message of President, IIUI

International Islamic university Islamabad is one of the most prestigious and leading universities of not only Pakistan but the whole of Islamic world. We at IIUI are committed to working hard for delivering quality education and producing knowledge in line with the aspiration of Muslim Ummah. IIUI has been doing its bit for decades to produce scholars and practitioners equipped with modern knowledge and imbued with Islamic worldview. The Department of Education is one of the most dynamic departments of the

university which has achieved many milestones in the field of teaching, training and research in its short history of two and a half decades. It has partaken in a number of national and international endeavors and has achieved the unprecedented academic excellence. The organization of the 3rd international conference titled ICITL-2020 is yet another achievement to its credit, which is indeed commendable. I would like to warmly welcome all the international and national delegates, keynote speakers, presenters and participants who are going to share their research findings in their respective fields which I am sure will generate result-oriented discussion and debate amongst academicians and researchers. It will provide an opportunity to the young researchers and educationists to set their future directions by becoming part of this inspiring and enlightening experience. I congratulate the organizers and wish everybody a wonderful time!

Dr. Hathal bin Hamoud Al-Otaibi

President, International Islamic University Islamabad

Message of Vice President (Administration, Finance & Planning)

The COVID-19 pandemic has posed an unprecedented challenge globally. In the field of education the challenges have been multifarious particularly in countries like Pakistan where internet accessibility still remains a privilege, hence, the transformation from face-to-face to online posed a number of difficulties, yet, the shift from face-to-face to online was the only way to deliver education during these hard times that proved its importance which had long

been neglected. I must congratulate the Department of Education, IIUI for organizing such a mega event that highlights the recent and upcoming issues and challenges for mutual deliberation. Organizing the 3rd international conference is a huge achievement on the part of the Department of Education and the Conference Organizing Committee that has established its standing in the academia particularly at a time when everyone is so preoccupied with the elongated spring semester and the processes of admission etc. Thank you all very much. I wish you a good time, wherever you are!

Prof. Dr. N. B. Jumani

Vice President (Administration, Finance & Planning), International Islamic University Islamabad

Message of VP (Academics)

The aim of educational institutions is to provide quality education and the Department of Education is striving hard to achieve academic excellence. Organizing an international conference is a huge challenge. I really appreciate the efforts made by the department of education for organizing this conference. This conference will address the expectations of the academic community and I am sure that Department of Education will further hold such conferences regularly. I warmly welcome all guest speakers and participants of the International Conference on Innovation on Teaching and Learning.

Prof. Dr. Ahmed Shuja Syed VP (Academics)

Message of VP (Higher Studies & Research)

The Department of Education, IIUI is offering various academic programs since 2000 and established its credibility in the field of teacher education and research. I want to congratulate the faculty members of the Department for their sincere efforts to organize International Conference on Innovation in Teaching and Learning. I hope that ICITL will provide a platform to the academicians, professionals and researchers to discuss latest educational trends, problems, challenges and opportunities in a collaborative learning environment.

Vice President, (Higher Studies & Research)

Message of VP (Female Campus)

Prof Dr. Farkhanda Zia

International Islamic university Islamabad is a unique center of learning in the Muslim world which strives to combine the essentials of the Islamic faith with the best of modern knowledge. Quality of education is the essential element for any educational institution to reach at academic excellence and department of education is one of the departments of IIUI struggling hard to prove it. I feel honored to welcome you the International Conference on Innovation in Teaching and Learning organized by the Department of Education and I am confident that this mega event will provide a forum to the young researchers, academicians, and professionals to re shape their knowledge with the collaboration of global and intellectual atmosphere.

Prof Dr. Farkhanda Zia

Vice President, (Female Campus)

Message of Dean, Faculty of Social Sciences

The Department of Education, IIUI, is organizing its 3rd international conference, ICITL-2020 that is yet another milestone in its pursuit of providing international forum of sharing knowledge and innovation in the field of education and training. As Dean, Faculty of Social Sciences, I appreciate the initiative taken by Department of Education to invite researchers, academicians, scholars and practitioners from around the globe on one platform to share their knowledge and expertise in their areas of research. This conference focuses on innovation in education, education for suitable development, professional development, and so on. We are and will remain

committed to delivering quality education and creating knowledge sharing avenues for our students and young researchers in the field of education. In the wake of COVID-19 pandemic we have realized the importance of social sciences and the importance of alternative solutions of disseminating knowledge which I hope this conference will focus. I hope that the conference will not only help initiate fruitful discussions, but will also present solutions of the challenges have posed by the pandemic and its aftermath.

Prof. Dr. Samina Malik,

Dean, Faculty of Social Sciences

International Islamic University Islamabad

Message of Chairperson, Department of Education (F)

As Chairperson Department of Education (Female) it is my great pleasure to welcome you all at the 3rd International Conference on Innovation in Teaching and Learning (ICITL-2020). This conference is in continuation of the department's vision of providing opportunities to the scholars and researchers in education to share their research and build up knowledge base for the sustainable development and to help the young researchers and scholars identify researchable areas and questions. The department, while following the same vision, has already organized two international conferences in 2016 and 2018

respectively. I hope that this conference, like our previous endeavors, will prove useful in creating networks and finding solutions to the problems in the field of education.

Dr. Shamsa Aziz,

Chairperson, Department of Education (F)

International Islamic University Islamabad

Message of Chairman Department of Education (M)

As a Chairperson Department of Education (Male), I warmly welcome you all to the conference, ICITL- 2020. The experts and academicians from all over Pakistan and from different countries are going to participate in this event and I am confident that this conference will meet the expectations of academic community. This opportunity will help us all discuss the pertinent issues and challenges in the field of education and come up with sustainable solutions. I would like to thank our committed team of colleagues who have been working for a long time to make this conference a success.

Dr. Muhammad Munir Kayani,

Chairperson, Department of Education (M)

International Islamic University Islamabad

INTRODUCTION

The need of educational innovation has become acute. It is widely believed that countries' social and economic well-being will depend to an ever greater extent on the quality of their citizens' education. The pace of change is mandating that we produce a faster, smarter, better grade of human being. Current systems are preventing that from happing. Hence, innovations in teaching and learning is the dire need of the modern era. Several practical recommendations are aimed to be achieved during this conference like: how to create a base for large-scale innovations and their implementation; how to increase effectiveness of technology innovations in education and how to raise time and cost efficiency of education. Raising the quality and scale of innovation s in education will positively affect education itself and benefit the whole society.

SCOPE OF THE CONFERENCE

This conference aimed at providing opportunities to students, teachers and researchers to share their experiences in the form of articles addressing the innovation, issues and challenges about following areas. This international exposure gave insight to the challenges of education at global level. The sharing of ideas allow for assessing the policies, pedagogies and current level of access to digital world. It helped to modify, reassess and replace the outdated practices for the sustainable development in education. These conference sessions will invite articles on following areas from students, teachers and researchers of national and international level.

CONFERENCE THEMES

- > Innovation in education
- > Education for sustainable development
- > Teaching and learning in a digital world
- > Leadership in the 21st century
- > Professional insertion
- > Social media and educational innovation in mathematics and science
- > Student's support system In 21st century
- > Learning and teaching for sustainable development

OPENING CEREMONY

The opening ceremony of 4 days International Conference on Innovation in Teaching and Learning was held at Faisal Masjid Campus of International Islamic University Islamabad on Monday September 28, 2020.

Vice President was chief guest on the behalf of President of International Islamic University Islamabad. The opening ceremony was also attended by the senior faculty member of the department, also faculty members of other departments, sister institutions and a large number of students.

Following speakers had graced the opening ceremony by their speeches:

Welcome Remarks by

- Dean, Faculty of Social Sciences, International Islamic University Islamabad, Prof. Dr. Samina Malik.
- Patron Of Conference & Vice President, International Islamic University Islamabad, Prof. Dr. Nabi Bux Jumani.
- Focal Person / Chairperson, Department of Education (Female Campus), International Islamic University Islamabad, Dr. Shamsa Aziz.

PROF. DR. SAMINA MALIK:

Dr. Samina Malik delivered a welcome address in which she elaborated the aims objectives and of the conference. "The conference will provide an opportunity to the young researchers and educationists to set their future directions by becoming part of this inspiring and enlightening experience" she said. She shed light on the importance of innovation and teaching in learning and also portrayed the nature of department's scope with advent of distance education that she said has become more vital in the global pandemic landscape. She thanked national and international speakers with for active participation and hoped that the conference will result in best recommendations on the discussed theme.

PROF. DR. NABI BUX JUMANI:

Prof. Dr. Nabi Bux Jumani appreciated the role of IIUI's education department at national and international forums terming it as country's one of the most recognized and professional departments. He told that department is among top 5 departments across the country having X category. He also apprised about the department's two journals on innovation and e learning and distance education adding that both of those have been international hailed and recognized.

The IIUI Vice President also discussed the global landscape with the view of pandemic, saying that the circumstances have doubled the importance of distance education and E-learning. He said Pakistan has a bright future in the field of education as nation's vision is evident since it has established Open University in 1970s. He also stressed upon importance of indigenous publications saying that the country has enough potential to deal with the scarcity of indigenous publication.

DR. SHAMSA AZIZ:

Dr. Shamsa Aziz greeted all and welcomed on the behalf of Education department, thanked all who were present in face to face and online mode Vice President, Deans, faculty members, students, participants academic and non-academic and key notes speakers. Thanked all her colleagues both academic and non-academic staff for their day and night efforts to bring this day into reality. She also appreciated and regards to the senior professor's for their guidance. She gave special thanks to Dr. Samina Malik and Dr. Nabi Bux Jumani.

Conference Keynote Speeches

FROM VIOLENCE TO NONVIOLENCE: EDUCATING FOR A SUSTAINABLE WORLD

Lester R. Kurtz.

George Mason University

Prof. Lester discussed about the coronavirus pandemic has created a window of opportunity for transforming our global village. Either it will be reshaped by the world's economic and political elites to enhance their profits or humanity will mobilize to create the world we want where "justice flows down like waters," as Dr. Martin Luther King, Jr. insisted (quoting the Psalmist from thousands of years before him). We must educate ourselves and our youth for the short run, and our children for the long run. We already know the desired outcome: a nonviolent world full of mutual respect, wellbeing and health for all, dignity and basic needs for all humans, and respect for the environment and all creatures with which we share the planet.

Following Mahatma Gandhi's nonviolent model of resistance of unjust systems, on the one hand, and construction of our desired society on the other, we need to develop ways of educating ourselves that prepare us for the future. Gandhi followed three steps that draw on the spiritual wisdom of the past and mindfulness of the present: listen, analyze, and mobilize.

First, deep listening involves combining ancient indigenous and spiritual wisdoms with modern scientific methods to discern grievances and structural patterns of violence. We then analyze their causes and consequences, identifying different types of violence (direct, structural, and cultural as Johan Galtung suggests, as well as eco violence). Finally, we frame our analysis and possible solutions in a way that mobilizes people to act, drawing upon people power as a counter to the power elite, channeling human and natural resources to build a sustainable world.

COLLABORATION IN EDUCATION DURING A PANDEMIC: EXPLORING UNIVERSITY PARTNERSHIPS AND DISTANCE EDUCATION IN THE U.S. AND SOUTH ASIA

David J. Roof

Ball State University

David J. Roof discussed about that his presentation will examine university partnerships between the U.S. and South Asia, using data collected over the past two years from a project involving Ball State University and faculty from Afghanistan. The primary objective is to share some lessons learned, and thoughts on the future of university partnerships following the pandemic. He said their research indicates that university partnerships can enhance educational opportunity and promote curriculum reform, gender equity, and other forms of social development. Unfortunately, the current status of international partnerships in education appears uncertain at this time. This presentation will consider the impact of this uncertainty and the path forward. The second part of the presentation will consider some of the recent lessons learned about distance learning during the pandemic in the U.S. and South Asia. To bridge these two topics, the presentation will cover the potential for university partnerships to help overcome the barriers to effective distance education.

PEDAGOGICAL CONTEXT OF TRANSFORMING TO ONLINE TEACHING

Nasir Mahmood, PhD Professor of Education

Allama Iqbal Open University Islamabad

Prof. Dr. Nasir Mahmood debate on campus less universities /virtual universities is around for more than a decade now. COVID 19 has played the role of a catalyst in providing impetus and necessity of online higher education as new normal for the years to come. Academia across the world is focused on making online education viable sustained option as mode of education at least equally credible, if not more, in comparison to Face-to-Face education. COVID has forced institution/faculty to transform existing Face-to-Face programs to online programs with whatever option and capability universities had at this point of time. Now, we have experienced the online teaching in one or other form through using varied platforms and faculty has fair understanding of challenges and opportunities facing us in formalizing online education.

The challenges range from planning of programs to development of courses, instructional issues, authentic assessment of student learning, student participation; IT related hardware and software challenges, recognition of online education at par with Face-to-Face education, etc. Relevant forum from government level to HEIs are all working on sorting out issues related to them. This presentation is only focused on transformation of teachers required to teach in an online classroom who were previously teaching in Face-to-Face classroom. There are 10 simple principles supportive for teachers to transform themselves into online teachers. They include easy to do practices like Show up to class, be yourself, put yourself in their shoes, organize course content institutively, add visual appeal, explain your expectations, scaffold learning activities, provide examples, make class an inviting and pleasant place to be, and commit to continuous improvement to become effective online teacher.

EDUCATIONAL TECHNOLOGIES IN ECONOMIC UNIVERSITY: KNEU EXPERIENCE (KYIV NATIONAL ECONOMIC UNIVERSITY NAMED AFTERVADYM HETMAN, UKRAINE)

Yeliena Prokhorova

Associate Professor, Management Department

Kyiv National Economic University named after Vadym Hetman,

Ukraine yeliena.prokhorova@kneu.ua

Dr. Yeliena provided information about KNEU mission and structure is presented and Educational technologies, which are used for different courses at different levels of education, are described. Distance and blended learning technologies before Covid 19 at the University application. Students' response for distance learning implementation from March 2020 according to the interview is analyzed. Distance learning prospects with Covid 19 are outlined.

INNOVATIVE LEADERSHIP: DECISION MAKING STYLES. STRATEGIES 2.0 AND 3.0 FRAMEWORKS FOR THE 21ST CENTURY SUSTAINABLE LEADERSHIP AMONGST DEANS AND ACADEMIC LEADERS IN HIGHER EDUCATION

Dr. Leele Susana Binti Haji Jamian

Faculty of Education, Universiti Teknologi MARA Malaysia, UiTM

Puncak Alam Campus, 42300

Puncak Alam, Selangor, Malaysia

leele@uitm.edu.my

Dr. Leele Susana discussed about in the current rapid world of uncertainty, change and Covid19 Pandemic, a more vibrant leadership amongst deans and academic leaders in the area of decision making is highly needed to administer and lead academic challenges at the institutions of higher education (IHE). Numerous past studies revealed that managerial decision-making related area is one of the hidden factors which contributes to the success of both managers/leaders and their organizations. Using Phd research findings on Decision Making Styles Inventory (DMSI) developed by Rowe and Boulgarides (1992) as the groundwork, this paper / plenary session aims to present the deans' DMSI and propose innovative decision making styles strategy frameworks for a sustainable leadership amongst deans and academic leaders both in Malaysia and global IHE. Findings from a quantitative method utilizing descriptive research design were employed involving a total of 54 deans from four Malaysian public universities. Data collected via a set of questionnaires using the survey method was analyzed and the scores derived from DMSI were categorized into four basic decision styles namely; directive, behavioural, analytical and conceptual (Rowe and Boulgarides, 1992). Findings revealed that the majority of deans scored the very dominant and dominant Behavioural decision style intensity instead of the other three styles. In view of these rigorous empirical findings, a proposed innovation on leadership from decision making styles angle is hoped to be a guideline for future deans and academic leaders' best practices towards an improved organization in the ever changing and unpredictable global environment. Thus, a humble innovative leadership design on Decision Making Styles; consisting of both strategies of 2.0 and 3.0 frameworks discussing on the balance of the cosmos and digital leadership for a sustainable 21st century leadership in higher education are shared for the betterment of the global ummah.

PAPER PRESENTATION SESSION I (ICITL-2020):

1.

<u>LIFE SKILLS EDUCATION FOR K-12 SCHOOL STUDENTS: A PERCEPTION OF</u> TEACHERS

Fatima Maqsood, PhD Scholar

Department of Education, FSS, IIUI

urfasyed@gmail.com

Ms. Fatima Maqsood discussed life skills education is considered extremely important in every one's life which equips them with problem solving behavior to manage all personal affairs and tackle difficult life situations. The key purpose of this investigation was to explore the teachers' perception regarding the essential life skills for K-12 school students and to identify the difference in the opinions of private and public school teachers about essential life skills for k-12 school students. This study was quantitative and descriptive in nature. Data were collected from 390 randomly selected teachers through self-developed questionnaire that was pilot tested and 0.82 Cronbach's Alpha reliability coefficient was found which indicated the appropriateness of the questionnaire for further use. Data were analyzed via calculating mean scores and independent t test. The results of the study illustrated that all of teachers possess very positive perception about every component of life skills for students but all of them emphasized significantly on coping and self-management skill which is related to personal and emotional aspects of their personality. A slight difference was perceived regarding the overall perception of male and female teachers. It was also observed that private school teachers have stronger perception about the overall life skills for their students as compared to the public school teachers.

2.

A STUDY ON E-LEARNING EDUCATION DURING COVID 19

Sumaira Batool, TRA

Department of Education, IIUI

Ms. Sumaira Batool discussed that Most of the institutes were still depending on the traditional teaching approach that is face to face teaching and learning. But during Covid 19 pandemic all educational institutions got close temporarily in almost all the countries of the world and introduced with new mode of teaching that is known as eLearning. Due to lockdown the traditional mode of teaching and learning was replaced with online learning. The major objective of the current research study is to assess the development of eLearning during Covid 19 pandemic and to recommend some best practices for eLearning. Through the development of different applications such as Zoom that make video chats, online conferencing and live meetings easy and possible also make teaching and learning more effective. The present study was descriptive in

nature. Mata analysis was done by using secondary data for present research study. The results indicated that eLearning plays very significant role during COVID19 pandemic and it would be more useful in coming years with the development of technology. It is recommended that for the development of eLearning and to make teaching learning process more effective and efficient innovation in technology is dire need of present day to avoid tensions and fears and also focused on eLearning that is cheaper and accessible to everyone.

3.

COMPARISON OF TEACHERS' TECHNOLOGICAL PEDAGOGICAL AND CONTENT KNOWLEDGE (TPACK) AT SECONDARY LEVEL

Humaira Akram, TRA Education/ PhD Scholar
DoE, IIUI

humaira.phdedu95@iiu.edu.pk

Prof. Dr. Samina Malik

Prof. Dr. N. B. Jumani

She highlighted the emerging trends in 21st century education have transformed the whole scenario of pedagogy. Therefore, this paradigm shift demands technological knowledge and expertise from teachers along with pedagogical content knowledge. The central theme of this study is based on an emerging interdisciplinary framework for teacher's knowledge regarding technology integration called technological, pedagogical and content knowledge (TPACK).

This framework is based on Lee Shulman's construct of pedagogical content knowledge to include technology knowledge. The objective of this study included to; compare technological pedagogical and content knowledge

(TPACK) constructs of computer science teachers at public and private schools.

This study has followed quantitative research approach. The target population was comprised of all computer science teachers working at public & private secondary schools located in the urban area of Islamabad. Using proportionate stratified random sampling technique, 32 computer science teachers (from public schools) and 40 computer science teachers (from private schools) were selected as sample of study. Data were collected using a self-developed questionnaire.

Data analysis was conducted using descriptive & inferential statistics. Results of the study indicated a significant difference between public and private CS teachers about TK, CK, PK, PCK, TPK however, non-significant difference in the case of TCK and TPACK.

APPLICATION OF GAGNE'S NINE EVENTS OF INSTRUCTION FOR DEVELOPING INSTRUCTIONAL MODULES FOR PROSPECTIVE TEACHERS AT UNDERGRADUATE LEVEL

Alina Raza, Teaching/Research Associate

Department of Education IIUI

alina.raza@iiu.edu.pk

Ms. Alina Raza highlighted that Gagne (2005) described nine specific internal processes that occur when a person is engaged in learning. It also explains how teacher can support these processes through steps called the events of instruction. The present study aimed at developing instructional modules for a course titled Teaching and Learning Strategies using Gagne's Nine Events of Instruction as basis for content development of module. Prospective teachers of BS Education 7th semester has been taken as the sample of the study. It is meant to explore new dimensions for teachers to apply Gagne's Nine Events of Instruction in the course development.

The instructional strategies as well as the assessment strategies were also designed according to the Gagne's events of instruction. The course structure was designed in the form of modules where each module was divided in many units.

As a result, a detailed course plan was devised having course title, module titles (with unit-wise division along with the objectives) and instructional procedure.

Finally, an implementation plan was prepared to ensure the smooth implementation of the instructional modules/courseware. It is concluded that the revision and up gradation of courses keeping in view learning and instructional design theories is very important to meet the upcoming demands of the teaching profession.

CLOSING CEREMONY

The Closing Ceremony of the 4 days 3rd International Conference On Innovation In Teaching And Learning (ICITL 2020) held at Faisal Masjid Campus of the International Islamic University Islamabad On Thursday October 1st, 2020 Organized By Department Of Education Of The International Islamic University Islamabad.

Following speakers addressed in closing ceremony:

- Worthy President International Islamic University Islamabad, Dr. Hathal bin Homoud Al-Otaibi
- Dean Faculty Of Social Sciences International Islamic University Islamabad, Prof. Dr. Samina Malik
- Focal Person/Chair International Islamic University Islamabad, Dr. Shamsa Aziz.

The concluding ceremony was addressed by Dr. Hathal bin Homoud Al-Otaibi, President IIUI as a Chief Guest.

DR. HATHAL BIN HOMOUD AL-OTAIBI:

He said that IIUI is committed to working hard for delivering quality education and producing knowledge in line with the aspiration of Muslim world. Hailing the organizers, he said Department of Education is one of the most dynamic departments of the university which has achieved many milestones in the field of teaching, training and research in its short history. Dr. Hathal maintained that E-learning and innovation are the salient needs of education in future. He said universities must focus on use of modern techniques of teaching and learning. IIUI President also emphasized that faculty must remain update to the advancements of the technology.

DR. SAMINA MALIK:

Dr. Samina Malik elaborated the aims objectives and of the conference. "The conference provided an opportunity to the young researchers and educationists to set their future directions by becoming part of this inspiring and enlightening experience" she said. She shed light on the importance of innovation and teaching in learning and also portrayed the nature of department's scope with advent of distance education that she said has become more vital in the global pandemic landscape. She thanked national and international speakers with for active participation and hoped that the conference will result in best recommendations on the discussed theme.

DR. SHAMSA AZIZ:

Worthy President International Islamic University Islamabad Professor Dr. Hathal bin Hamoud Al-Otaibi, Honourable Vice president A F & P Professor Dr. Nabi Bux Jumani, Respected Dean Faculty of Social Sciences Dr. Samina Malik, respectable guests Vice Presidents, Deans, DGs, Directors, HoDs, keynote speakers, colleagues from department of education IIU and sister institutions, paper presenters, participants and dear students Asslam o alkum.

It's a moment of great pleasure for me to present the report of international conference on innovation in teaching and learning in front of you which is 3rd of its series and a valuable addition

to the conferences and seminars conducted by department of education during last few years due to dedicated efforts of our faculty members and kind guidance and support of our seniors. 3rd International Conference on Innovation in Teaching and Learning (ICITL-2020) was aimed to provide opportunities to students, teachers and researchers to share their experiences in the form of articles addressing the innovations, issues and challenges under the themes

- 1. Innovations in education
- 2. Education for sustainable development
- 3. Teaching and learning in a digital world
- 4. Leadership in the 21st century
- 5. Professional insertion
- 6. Social media and education
- 7. Innovations in mathematics and science education
- 8. Students' support system in 21st century
- 9. Educational interventions
- 10. Learning and teaching for sustainable development

This conference was planned back in December 2019 for holding in April 2020 but due to Covid 19 we were compelled to postpone it, later on we planned it for online and I will not be wrong if I labeled it as hybrid or blended conference as we had face to face keynote sessions with local speakers and had online and recorded keynotes from different corners of the world too, same was the case with paper presenters. We had one face to face session and 16 online sessions in which 85 papers were presented 139 abstracts were received in response to call for paper out of which 71 abstracts were fully accepted and 30 abstracts were sent for minor revisions. At the end 85 research papers were got registered by authors from more than 15 institutions including University of Karachi, Air university Islamabad, SZABIST, UMT Lahore, MUST Mirpur, National University of Computer and emerging sciences, NUML Islamabad, KUST Kohat, AIOU, Information technology university Lahore, University of Punjab, FJ, federal college of education and IMCG Islamabad and definitely from IIU. Researchers were from different disciplines including Education, Psychology, Special Education, Humanities and Education, Linguistic and Communications, Elementary Teacher and Early Childhood Education, Sociology and others.

Out of those 85 papers 9 were related to innovations in education, 14 on education for sustainable development, 24 on teaching and learning in the digital world, 6 on leadership in the 21st century, 7 were related to professional insertion, 2 to social media and education, 7 to innovations in mathematics and science education, 2 were on students' support system in 21st century, 7 on educational interventions and 5 were in the area of learning and teaching for sustainable development.

Presenters shared good research work with unique topics from multiple key areas that need to be addressed in the research, generated healthy debate and ended on workable recommendations which will be shared in detailed conference report on IIU web.

Beside these 3 keynotes on opening day and 3 in today's morning session shared their thought provoking ideas with future researchers. These national and international keynote speakers were;

- 1. Prof. Lester Kurtz from George Mason University, USA whose talk was titled "from violence to non-violence; educating for sustainability"
- 2. Prof. Thomas Simon from John Hopkins University, USA shared his ideas on
- "Media competencies"
- 3. Dr. David Roof from Ball state University, USA shed light on "Collaboration in Education during a PANDEMIC"
- 4. "Pedagogical context of transforming to online teaching" was the title of the talk delivered by Prof. Dr. Nasir Mahmood from AIOU, Islambabad Pakistan.
- 5. Dr. Yeliena Prokhorova, Kyiv of National Economic University, Ukraine shared experiences of "educational technologies in economic university".
- 6. While Dr. LeeLe Susana, University teknologi, MARA, Malaysia discussed

In short I can say it was a fruitful 4 days activity for students, educationists and researchers but it was only a milestone of the journey of department of education International Islamic University Islamabad. We the faculty members of department of education are committed to continue our routine feature of organizing annual conferences for the provision of a platform for deliberation and knowledge sharing not only for the future generation of Pakistan but for whole Umma

At the end I want to thank to all who made this event a success.

Thank you and good luck.

It was also attended by Prof. Dr. N.B. Jumani, a renowned online teaching distance learning expert and Vice President (Administration, Finance and Planning) at IIUI, Prof. Aqdas Naveed Malik, VP HS&R, Dr. Samina Malik, Dean Faculty of Social Sciences of IIUI, Dr. Muhammad Munir Kayani, Head of the Department, Dr. Shamsa Aziz, Chairperson at Department of Education, experts of the field of education, faculty members of the department, also faculty members of the other departments sister institutions and students.
