# Academic Qualification:

MSc Electrical Engineering (System on Chip), 2 Years
Linköping University Sweden, (2009) GPA (3.44/4.0) (Converted from ECTS and Swedish grade systems)
BSc Electrical Engineering (Major in Electronics and Communication); 4 Years. 1<sup>st</sup> Division.
University of Engineering and Technology Taxila Pakistan.
BSc (Applied &Pure Mathematics, Physics); Two Years, University of the Punjab Lahore, Pakistan. 1<sup>st</sup> Division.

## **Relevant Research Experience:**

During my MSc thesis I have acquired an experience of doing research within electronic devices group at Linkoping University Sweden.

<u>http://www.ics.isy.liu.se/en/</u>. The duration of my research experience was almost one year.

#### **Study Curriculum with Rankings:**

# MSc Electrical Engineering (System-On-Chip), Linkoping University Sweden:

The Electrical Engineering Department of Linkoping University has very good ranking worldwide.

#### The course curriculum is listed below:

Radio Electronics, Radio Frequency Integrated Circuits, Evaluation of an Integrated Circuits, VLSI Design (CDIO), Analog and Discrete Time Integrated Circuits, Mixed Signal Processing System (CDIO), Digital Project Course, Digital System Design

# **BSc Electrical Engineering**, (4 Years) University of Engineering & Tech: Taxila, Pakistan:

University of Engineering & Technology Taxila (Pakistan), is one of the leading university from public sector universities in Pakistan. <u>https://www.hec.gov.pk/english/services/universities/Ranking/2010/Pages/C</u> <u>ategory-Wise-Rankings.aspx</u>

My major courses are linked to electronic & communication engineering **BSc (Maths A&B, Physics, Two Years) University of the Punjab** Lahore, Pakistan:

My major courses are linked to mathematics A (Pure mathematics),

Mathematics B (Applied mathematics), Physics. This is also one of

the leading university in Pakistan in general category: <u>https://www.hec.gov.pk/english/services/universities/Ranking/2010/P</u> ages/Category-Wise-Rankings.aspx

# Muhammad Shuaib Chip Design Projects:

## 1: <u>CENIIT project 03.03</u> "Testability-oriented Design Techniques for Mixed-Signal/ RF Integrated Circuits"

In this project, principal investigator was Professor Jerzy Dabrowski at Linkoping university Sweden. Main goal was to develop testability-oriented design techniques for mixed signal/RF integrated circuits. My contribution in this project was to design a circuit regarding on-chip test for linearity. To achieve this objective, I designed "Two-Tone PLL For On-Chip Test In 90nm Technology" at system level, at the circuit and transistor level. This project was my MSc thesis. In later years, this PLL was fabricated and results were published in IEEE transactions. For more detail please follow this link.

http://users.isy.liu.se/en/eks/jdab/Ceniit03-03.html

# 2. "Design, Analysis and testing of DLL chip"

In this project I learned how to design, tape out and test a chip. This project was taken in a complete semester course "VLSI Design (CDIO)". Through this project, I got an experience of all phases of chip, viz; system level design, circuit level, transistor level design, lay out and finally testing of chip after fabrication.

- 3. Apart from above, I have also done projects related to mixed signal processing system and digital IC domain at the system level, circuit level and transistor level.
- 4: "Design of high gain, good gain-bandwidth product, low power Op-amp for continuous time sigma-delta modulator"

In this project, I designed two-stage op-amp with class AB as output stage for continuous-time sigma-delta modulator in 180nm TSMC CMOS process. Results of this project were published in "The 5th International Conference on Integrated Circuitsand Microsystems, **23**, **Oct**, **2020**. **China**.

5: "Design, analysis and simulation of TIA-Analog Front End (TIA-AFE) for optical sensing applications"

I designed low noise, high gain transimpedance amplifier for optical sensing photoreceiver. This project has been designed by using CMOS AMI Semiconductor's C5 process. Results of this project were published in" The 4<sup>th</sup> International Conference onCircuits, Systems and Simulation (**May 26,2021**). **Malaysia**.

6: "LNA for mm-Wave Receiver (60GHz)

I designed 60 GHz,12mW,20 dB Gain, CMOS mm-wave LNA with 6.3-dB NF for high data rate wireless communication systems by using EDA tool Cadence Virtuoso (IC614) and 130nm rf TSMC PDK. This research results are accepted in IEEE 11th International Conference on Communications, Circuits and Systems, May **13-15,2022. Singapore**.

## 7. "Ultra-Low Voltage and Ultra Low Power Three Stage OTA Design"

Presently I am working on this project, goal is to design Ultra-Low Voltage and Ultra Low Power Three Stage OTA in subthreshold region", to the tape out level with EDA tool Cadence Virtuoso (IC614) and 130nm Bulk CMOS, TSMC PDK.

# Experience:

## 1: Teaching Experience (01-01-2010 to date):

Presently I am Assistant Professor at International Islamic University Islamabad (Pakistan), in Electrical engineering department;

# **Muhammad Shuaib**

http://www.iiu.edu.pk/index.php?page\_id=2062 with responsibilities research and teaching. I teach Electronic Circuit Design Course, Analog Filter Design Course, VLSI Design Course, Micro Electronic Technology Course, Circuit Analysis (1&2 Courses). Basic Circuit Theory (BEE). Apart from this, I was also undergraduate in charge for one year. I am also member of the team who has established Advanced Electronic Lab. This project has been funded by IDB (Islamic Development Bank). During the execution of this project, I have worked with the Principal Investigator. I was part of team who had conducted two national level workshops: National Workshop on ASIC Design and CMOS Processes (25 to 27-05-2011), in collaboration with National Centre for Physics (Quaid-e-Azam University, Islamabad).

https://www.iiu.edu.pk/?page\_id=9715

And second workshop: National Workshop on Advanced Electronic: Device Design And Process Characterization (02-03.12.2013) funded by HEC (Higher Education Commission of Pakistan). In this workshop, HEC, Pakistan released amount in favor to me for conducting this workshop. I have supervised various projects at undergraduate level. <u>https://www.iiu.edu.pk/?page\_id=14227</u>

**2: 2003- To- 2006 Assistant Manager (Electrical Engineer), GEPCO, Pakistan:** I have been working as Assistant Manager in (Gujranwala Electric Power Company) in Pakistan, which is one of the companies in Pakistan, which provides and distributes electricity to the consumers. I was member of the team whose responsibilities were to carry out testing and troubleshooting, especially the protection and instrumentation wing of the system.

#### 3: 2002-To-2003Assistant Director, Punjab Industries (Electrical Engineer):

I have been working as Assistant Director in Punjab Industries, Mines and Mineral Department (Pakistan).

## <u>Grant:</u>

US \$5324 by Higher Education Commission (HEC) of Pakistan to conduct workshop, National Workshop on Advanced Electronics: Device Design & Process characterization on 02-03.12.2013. <u>http://oric.iiu.edu.pk:4111/oweb/cws.php</u>

# Please read Sr No: 11, on above mentioned link

# **Reviewer and Session Chair Experience :**

1: Reviewer of 11th International Conference on Communications, Circuits and Systems (ICCCAS 2022), held on 13-15-2022 at Singapore

http://www.icccas.org/

2: I have chaired two sessions of 2020 IEEE 5<sup>th</sup> International conference on Integrated Circuits and Microsystems (ICICM2020) October 23-25 China. http://www.icicm.net/index.html

#### **Interest Area:**

Analog/Mixed-Signal IC design, RF/Analog circuits for wireless communication, Low-Power analog circuit design. Delta-Sigma Converters, Nyquist rate data – converters, Phase locked loops and CMOS Image Sensors. Optical receiver.

#### **EDA Tools Experience:**

Cadence (HDL, Schematic, Virtuoso, LVS, Assura, Calibre, Spectre /Spectre RF), Mentor graphic IC Design. ADS. LT Spice, Hspice, Electric VLSI. High-Level circuit modelling languages such as VHDL, Verilog, and Verilog-A, MATLAB& Simulink.

#### **Processes:**

I have ability to work in micron, sub-micron, deep submicron, ultra-deep submicron CMOS processes

#### Social Skills:

I have ability to work independently as well as with in team. I have also experience to work with people of diverse social, cultural, and educational background this experience was obtained during my study in abroad (Sweden) and also through organizing, IEEE the 5th International Conference on Integrated Circuits and Microsystem Circuits and Microsystems, 23-25 October 2020, Nanjing, China.
