

Dr. KIRAN ABDULLAH

Assistant Professor, SA-CIRBS, Faculty of Basic & Applied Sciences, IIU Islamabad

Dr. Kiran Abdullah has joined SA-CIRBS, IIU as an Assistant Professor in February 2019. She did her PhD from College of Science, China University of petroleum (Huangdao) Qingdao, China. Her PhD work was based on “Synthesis, Fabrication of Ordered Supramolecular Assemblies and Chemical Sensing Properties of Phthalocyaninato Complexes”. During her PhD research work, she has published papers in internationally reputable journals and has presented her work in various international and national conferences.

Dr. Kiran's research interest includes synthesis, characterization and fabrication of an amphiphilic mixed (phthalocyaninato) (porphyrinato) europium triple-decker complexes; Synthesis of Organic semiconductors and hybrid nanoparticles devices; Fabrication of thin-film and further their applications for the separation and detection of analyte of interest (volatile organic compounds (VOCs), toxic gases, macromolecules etc.
