

CONFERENCE REPORT

**2nd INTERNATIONAL CONFERENCE ON
INNOVATION IN TEACHING AND LEARNING**

(ICITL-2018)

OCTOBER 17th & 18th, 2018

DEPARTMENT OF EDUCATION

FACULTY OF SOCIAL SCIENCES

INTERNATIONAL ISLAMIC UNIVERSITY ISLAMABAD

SPONSORS

**Department of Education, International Islamic University, Islamabad cordially
acknowledge the contributions of**

Higher Education Commission (HEC), Islamabad

Patron in Chief: Prof. Dr. Ahmed Yousif Ahmed Al Draiveesh, President, IIUI

Patron: Prof. Dr. N. B. Jumani, Professor of Education/Director, Directorate of
Distance Education, IIUI

Chairperson: Prof. Dr. Samina Malik, Dean, Faculty of Social Sciences, IIUI

Focal Person: Dr. Muhammad Munir Kayani, Chairman, Department of Education

Conference Organizing Committee

1. Prof. Dr. Samina Malik, Dean, Faculty of Social Sciences
2. Prof. Dr. N. B. Jumani, Professor of Education/Director Directorate of Distance Education
3. Dr. Muhammad Munir Kayani, Associate Professor/Chairman Department of Education (Male Campus)
4. Dr. Shamsa Aziz, Associate Professor/Chairperson, Department of Education (Female Campus)
5. Dr. Azhar Mahmood, Associate Professor, Department of Education
6. Dr. Asad Abbas Rizvi, Assistant Professor, Department of Education
7. Dr. Munazza Mahmood, Assistant Professor, Department of Education
8. Dr. Shazia Naureen, Assistant Professor, Department of Education
9. Dr. Zarina Akhtar Assistant Professor, Department of Education
10. Dr. Sh. Tariq Mahmood, Assistant Professor, Department of Education
11. Dr. Muhammad Zafar Iqbal, Assistant Professor, Department of Education
12. Ms. Fouzia Ajmal, Assistant Professor, Department of Education
13. Ms. Alina Raza, Teaching & Research Associate, Department of Education
14. Ms. Sumaira Batool, Teaching & Research Associate, Department of Education
15. Ms. Humaira Akram, Teaching & Research Associate, Department of Education

Report Compiled by:

1. Dr. Muhammad Zafar Iqbal Chaudhary
2. Ms. Alina Raza
3. Ms. Sadia Dilshad
4. Ms. Memoona Bibi

Message of the President, IIUI & Patron in Chief 2nd ICITL-2018

The Department of Education, IIUI is offering a variety of academic programs since 2000. Department of Education has established its credibility and recently launched a variety of programs through dual mode of learning. Organizing another International Conference is a big challenge and I really appreciate the efforts made by the senior faculty members Prof. Dr. Samina Malik, Prof. Dr. N. B. Jumani, the chairpersons Dr. Shamsa Aziz and Dr. Muhammad Munir Kayani and all faculty members of the Department for organizing this conference. This conference will meet the expectations of the academic community. I am confident that the Department of Education would hold this conference annually. I warmly welcome all keynote guest speakers, paper presenters, faculty and participants of the 2nd International Conference on Innovation in Teaching and Learning ICITL-2018. I have high appreciations and encouragement for the Department of Education.

Prof. Dr. Ahmed Yousif Ahmed Al Draiweesh
President, International Islamic University Islamabad

Message of Dean Faculty of Social Sciences & Patron 2nd ICITL-2018

International Islamic University, Islamabad has been playing a pivotal role in the development of higher education sector of the country. The organization of 2nd ICITL-2018 is yet another endeavor in this regard. The academicians from different countries and from all over Pakistan are joining this event. Therefore, it is hoped that this conference will provide an opportunity to all of us to learn about innovative practices in the field of education, teaching and learning. It is the 6th international event being organized by the Department of Education.

Prof. Dr. Samina Malik
Professor of Education/ Dean, Faculty of Social Sciences, IIUI

Message of Patron 2nd ICITL-2018

The 2nd International Conference on Innovation in Teaching and Learning (ICITL) will be an exciting learning event being organized by Department of Education, IIUI. Besides sharing the expertise with each other during the event and elaborate own expertise, I am sure that the participants will have a forum for socialization within their field.

Prof. Dr. N. B. Jumani
Professor of Education & Director, Directorate of Distance Education, IIUI

Message of Conference Chair/Focal Person 2nd ICITL-2018

The aim of this International Conference is to provide a forum to academicians, researchers, educational leaders, social scientists, practitioners, research scholar and students to bring forth innovations in teaching and learning. This conference's sessions will aim at addressing the many opportunities as well as challenges, current and future directions afforded by technological innovations in the field of education. There were 237 abstracts and after review 207 were accepted. Total 173 abstracts were presented in the conference related to different themes of innovation in teaching and learning.

Dr. Muhammad Munir Kayani
Chairman, Department of Education (M)/Addl.Dir DDE, IIUI

Message of the Co-chair 2nd ICITL-2018

The organizing committee of 2nd International Conference on Innovation in Teaching and Learning (2nd ICITL, 2018) has invited the renowned keynote speakers to enlighten the audience with their research and specialization. I trust that the conference will not only provide a useful forum to the participants to share their expertise in the field of Education but will also be a networking opportunity for them. I wish all the success for the event.

Dr. Shamsa Aziz
Chairperson, Department of Education (F), IIUI

List of Abbreviations

AIOU	Allama Iqbal Open University
IIUI	International Islamic University, Islamabad
NUML	National University of Modern Languages
GCUF	Government College University, Faisalabad
HEC	Higher Education Commission
LMS	Learning Management System
BZU	Bahauddin Zakariya University
PD	Professional Development
ICDEEL	International Conference on Distance Education and E-Learning
ODL	Open and Distance Learning
IIRD	International Institute for Research & Dialogue

BKUC	Bacha Khan University Charsadda
IER	Institute of Educational Research
EPPSL	Educational Planning Policy Studies And Leadership

Scope of the Conference

This conference aims at addressing the challenges related to current educational practices and future directions afforded by technological innovations in the field of education. Innovations allowing broader access to education at a global level as well as innovations in teaching and learning in modern era demand that traditional theories and views on how learning is designed and delivered, but also educational policies at the institution or state level, be reassessed, adjusted, modified, repurposed, and perhaps even replaced. This conference's sessions will invite articles involving, but not limited to, the following areas from students, teachers and researchers from national and international level:

Conference Themes

- Innovation in Curriculum and Instruction
- Innovations in Higher Education
- Innovations in Educational Research
- Innovations in Mathematics and Science Education
- Learning and Teaching for Sustainable Development
- Sustainable Changes in Education
- Professional Insertion
- Teaching and Learning in Digital World
- Students' Support System in 21st Century
- Leadership in 21st Century
- Educational Intervention
- Social Media and Education
- Innovations in Distance Education and E-Learning
- Innovation in Blended Learning
- Invocations in Evaluation/Assessment Techniques/Strategies /Tools
- Innovative Educational Pedagogies/Strategies/Tools
- Technology Innovations and its Impact on Education
- Internationalization of Education, Challenges, and Impact

Executive Summary

The Department of Education, Faculty of Social Sciences, International Islamic University Islamabad in collaboration with Higher Education Commission, Pakistan has executed second International Conference on Innovation in Teaching and Learning (ICITL-2018). This conference's sessions aimed providing opportunities to address the challenges as well as current and future directions afforded by technological innovations in the field of education.

The selected papers were in the areas of Learning and Teaching for Sustainable Development, Innovations in Curriculum and Instruction, Professional Insertion, Teaching and Learning in a Digital World, Student's support system in 21st century, Leadership in the 21st century, Educational Interventions, Social Media and Education, Innovations in Distance Education and E-Learning, Blended Learning, Higher Education, Educational Research, Mathematics and Science Education, Evaluation/Assessment Techniques, Educational Pedagogies/Strategies and Internationalization of Education, Technology Innovations and Its Impact on Education.

The keynote speakers included eminent professors from different countries having diverse experience in the field of education including Dr. Martin Valcke, Ghent University Department of Educational Studies Gent Belgium, Prof. Dr. Bill Atweh Visiting Professor, Philippines Normal University and Adjunct Professor, Curtin University, Australia, Prof. Dr. Sarah Younie, De Mountfort University UK, and David J. Roof, Ball State University USA.

The national invited speakers included Prof. Dr. Parveen Munshi, Vice Chancellor, University of Sufism & Modern Sciences, Bhattishah, Sindh. Prof. Dr. Riaz Ul Haq Tariq Chairperson, NACTE. Prof. Dr. Mehmood ul Hasan Butt, Advisor, HEC, Islamabad, Prof. Dr. Munawwar S. Mirza Ex-Chairperson, NACTE, Prof. Dr. Razaqat Ali Akbar Director, Institute of Education and Research, University of the Punjab, Professor Dr. Muhammad Khan Professor of Politics and International Relations-IIUI, Prof. Dr. Muhammad Ramzan Dean, Faculty of Social Sciences and Humanities, Karakoram International University, Prof. Dr. Arshad Ali, IER, University of Peshawar, Dr. Waheed Noor Director DDE, University of Balochistan, Prof. Dr. Saeed Mahr, IER, University of the Punjab.

Total 237 abstracts were received for the conference and 207 abstracts were accepted while 173 papers were presented in parallel sessions in the 2 days. International paper presenters in this conference were from Faculty of Industrial Management, University Malaysia Pahang and Imam Abdul Rahman Bin Faisal University Dammam, Saudi Arabia. National presenters came for this conference were from Abdul Wali Khan University Mardan, Aga Khan University Institute for Educational Development, Air University Islamabad, Allama Iqbal Open University, Islamabad and Bahawalpur, Bahauddin Zakariya University, Multan, Comsats University Islamabad, Imperial College of Business Studies Lahore, Department of Higher Education, Khyber Pakhtunkhwa – Pakistan, Education Department, Government of Punjab, Fatima Jinnah Women University Rawalpindi, FG Public School No 2 (Boys), Tariqabad Rawalpindi Cantt Pakistan, Forman Christian College University, Lahore, Foundation University, Islamabad, Government College University Faisalabad, Government College Women University Sialkot, Govt

Training College For The Teachers of Blind, Lahore, Hazara University, Mansehra, Institute of Agri Extension And Rural Development, University of Agriculture Faisalabad, Iqra College of Education, Islamabad, Karakorum International University, Kohat University of Science and Technology, Lahore College for Women University, Lahore, Malakand University, Ministry of Federal Education & Professional Training, Islamabad, Mirpur University of Science & Technology Mirpur AJK, National University of Modern Languages, Islamabad, Northern University Nowshera, KPK, PMAS- Arid Agriculture University Rawalpindi, Pakistan, Preston University Islamabad, Quaid-E-Azam Academy for Educational Development Punjab, Lahore, Read Foundation, Society for Access to Quality Education, Bahawalpur, Sarhad University of Science and Information Technology, Sukkur Institute of Business Administration, The Balochistan University of Information Technology, Engineering, And Management Sciences, Quetta, Balochistan, The University of Lahore, The University of Lahore, Pakpattan Campus, University of Chitral, University of Education Township Lahore, University of Education, Campus Faisalabad, University of Engineering and Technology Taxila, University of Karachi, Karachi, University of Kotli, Azad Jammu And Kashmir, University of Lahore, Lahore, University of Management & Technology Lahore, University of Sargodha, University of Sufism & Modern Sciences, Bhattishah, Sindh, University of the Punjab, Lahore and University of Wah, Wah. From IIUI the paper presenters were from Department of Education, Department of Media & Communication Studies, Department of Psychology, Department of Sociology, International Islamic University Islamabad and Department of Translation & Interpretation International Islamic University, Islamabad.

Around 800 academicians and researchers from various educational/research institutions of Pakistan and abroad attended the conference. This conference has met the expectations of the academic community and has provided networking opportunity for them. The main recommendations of the conference include that academicians have a greater responsibility to pursue excellence in several directions including leadership, development of curriculum, developing various skills, academic management, teaching skills, pursuing scholarships, research and knowledge exchange and many more. The need to adopt international practices and paradigm shift from teacher centered teaching to the active involvement of teachers and students towards students' continuous learning process were stressed. Through utilizing innovative ideas in teaching and learning and translating the capacity of the vision into reality was recommended. The sessions emphasized to create conducive, active and competitive learning environment to make the transformative and innovative strategies more applicable.

**2ND INTERNATIONAL CONFERENCE ON INNOVATION IN TEACHING
AND LEARNING (ICITL-2018)**

October 17-18, 2018

Conference Schedule

Day 1 October 17th, 2018

Time	Event	Venue
8:30am–9.45am	Registration & Guest Seating	Quaid-e-Azam Auditorium
10:00am–11:25am	Opening Session Welcome Remarks, (Prof. Dr. Samina Malik, Dean FSS) Speeches Scope of Conference, (Dr. Muhammad Munir Kayani, Conference Chair) Initiatives of Department, (Dr. Shamsa Aziz, Conference Co-Chair) Worthy President, IIUI Chief Guest Vote of Thanks, (Prof Dr. Nabi Bux Jumani, Patron of the conference)	Quaid-e-Azam Auditorium
11:30am–11:45am	Tea & Networking Break	Outside Hall
11:50am–1:20 pm	Keynote Speeches I (20 Min Each)	Quaid-e-Azam Auditorium
11:50am–12:10 pm	1. Globalization as Innovation in Educational Research (Prof. Dr. Bill Atweh, Australia)	
12:10–12:30 pm	2. Workable Framework For Distance Education Program In Pakistan (Dr. Waheed Noor)	
12:30–12:50 pm	3. Professional Assertions on Rethinking Teacher Education in Pakistan (Prof. Dr. Mehmood ul Hasan Butt)	
12:50–1:10 pm	4. Changing Times and Challenges of Meaningful Education (Prof. Dr. Riaz-ul-Haq Tariq)	
01:25 - 02:25pm	Lunch & Prayer Break	Outside Hall
2:30 - 04:00 pm	Parallel Session- I (15 min each presenter)	Quaid-e-Azam Hall 1, Rooms 2, 3, 4, Iqbal Hall: Rooms 5, 6, 7, 8, 9, 10
04:00-04:20 pm	Key note Speeches II (20 Min Each) 1. Impact of Technological Innovations on Developing Pedagogical Practices at University Level (Prof. Dr. Parveen Munshi)	Quaid-e-Azam Auditorium
04:20-04:40pm	2. Innovation in Assessment of Learning: Need of 21 st Century (Prof. Dr. Rafaqat Ali Akbar)	

04.40-05.00 pm	3. Are our Graduates Ready for the Profession? Clinical Simulations to Foster the Development of Critical Competences in Higher Education? (Prof. Dr. Martin Valcke) Virtual Presentation	
05.00-05.20 pm	4. Improving the Quality of Education, via a Knowledge Mobilization Strategy, for Achieving UNESCO Sustainable Development Goal (SDG4C) (Prof. Dr. Sara Youni) Virtual Presentation	

Day 2 October 18, 2018

Time	Event	Venue
08.30–09:00am	Registration	Quaid-e-Azam Auditorium
09.00– 10:20am 09.00– 9:20am 09.20–9:40am 09.40–10:00am 10.00– 10:20am	Key note Speeches III (20 Min Each) 1. Leadership in 21 st Century (Prof. Dr. Muhammad Khan) 2. Innovation in Higher Education (Prof. Dr. Muhammad Ramzan) 3. Formative Assessment As Innovative Tool Of Learning (Prof. Dr. Arshad Ali) 4. Enhancing Educational Partnerships: How The U.S. And Pakistan Can Work Together To Reform Education And Teacher Development (Dr. David Roof)	Quaid-e-Azam Auditorium
10:30-12:00 pm	Parallel Session-II (15 min each presenter)	Quaid-e-Azam Hall 1, Rooms 2, 3, 4, Iqbal Hall: Rooms 5, 6 , 7, 8, 9, 10
12:00 - 1:30pm	Parallel Session-III(15 min each presenter)	Quaid-e-Azam Hall 1, Rooms 2, 3, 4, Iqbal Hall: Rooms 5, 6 , 7, 8, 9, 10
01:30 - 02:15pm	Lunch &Prayer Break	Outside Hall
02:20 - 03:20pm 02:20 - 02:40pm 02:40 -03:00pm	Key note Speeches III (20 Min Each) 1. 70 Years of Education in Pakistan: A Historical Perspective (Prof. Dr. Saeed Mahr) 2. Modern Learning Tools and the Role of Teacher (Prof. Dr. Munawwar Mirza)	Quaid-e-Azam Auditorium
03:00-04:30pm	Closing Ceremony Report of Conference, Prof. Dr. Nabi Bux Jumani Address Worthy President, IIUI Chief Guest Vote of Thanks,(Prof. Dr. Samina Malik, Dean FSS)	Quaid-e-Azam Auditorium
4:30 – 5:00 pm	Tea Break	Outside Hall

Opening Ceremony

The opening ceremony of the two days international conference on innovation in teaching and learning held at Faisal Masjid campus of the International Islamic University, Islamabad on Wednesday October 17, 2018. Following speakers had graced the opening ceremony by their speeches:

- Vice President, International Islamic University Islamabad, Prof. Dr. Muhammad Munir.
- The guest of honor Dr. Mahmood-ul-Hassan Butt, Consultant, Higher Education Commission Islamabad.
- Mr. Fida Hussain Director General, Learning Innovation Division Higher Education Commission Islamabad.
- Dean, Faculty of Social Sciences, Prof. Dr. Samina Malik.
- Patron of conference and Director, Directorate of Distance Education Prof. Dr. Nabi Bux Jumani.
- Conference chair/Focal Person & Chairperson Department of Education (male campus) Dr. Muhammad Munir Kayani.
- Conference co-chair & chairperson, Department of Education (female campus) Dr. Shamsa Aziz.

Dr. Mehmood ul Hassan Butt addressed as a chief guest at the opening ceremony of the conference that progressive attribute of education must be stressed and focused to meet the requirements of modern era. He maintained that innovation is all about learning new things with different approaches and it leads towards exquisite and significant impact and results. “Islamic scholars and educationists have a vital role in advancing innovation in the field of education” he told. He also discussed Islamic history and renaissance and different innovative approaches in education.

Dr. Muhammad Munir, Vice-President, IIUI urged the students to explore the knowledge on specific aspects through experts of the conference. He also highlighted importance of research and adoption of innovation.

Dr. Samina Malik, Dean, Faculty of Social Sciences elaborated objectives of the conference and said that it was aimed at addressing opportunities, challenges and directions afforded by the technological innovation in the field of education. He said that “We will have to let our youth think out of the box” because it is a salient attribute of innovation and progress”. She further said that “use of technology does not make things innovative, while it was necessary that innovative approaches be adopted”.

Dr. Nabi Bux Jumani, the Patron of the Conference and Director, Distance Learning Programs paid vote of thanks to all the participants of the conference, paper presenters, keynote speakers and students to grace the occasion and hoped to make it a success.

Dr. Muhammad Munir Kayani, Conference Chair and Chairperson, Department of Education (Male Campus), elaborated the scope of the conference with respect to the narrative behind its initiative. He said that this conference is a forum for

academicians, researchers, educational leaders, social scientists, practitioners, research scholar and students to bring forth innovations in teaching and learning.

Dr. Shamsa Aziz, Conference Co-Chair and the Chairperson Department of Education (Female Campus) dilated upon the initiatives taken by the Department of Education for quality education. She explained how department of education International Islamic University, Islamabad has been playing a pivotal role in the development of higher education sector of the country and involved in various academic and co curricular activities to groom and polish students intellectual capabilities. She stressed upon participating such type of activities for the professional development of educators.

The opening ceremony was also attended by Vice President, Female Campus Prof. Dr. Farkhanda Zia, senior faculty member of the department and a large numbers of the students.

At the end of the ceremony, Vice-President International Islamic University Islamabad, Prof. Dr. Muhammad Munir, Dean Faculty of Social Sciences, Prof. Dr. Samina Malik, Patron of conference, Prof. Dr. Nabi Bux Jumani, Conference Chair, Dr. Muhammad Munir Kayani Conference Co-Chair Dr. Shamsa Aziz presented the university insignia to the Chief Guest Dr. Mahmood ul Hassan Butt. Dean, Faculty of Social Sciences, Prof. Dr. Samina Malik, Patron of conference Prof. Dr. Nabi Bux Jumani, Conference chair, Dr. Muhammad Munir Kayani Conference co-chair Dr. Shamsa Aziz also presented souvenir to vice-president International Islamic University Islamabad, Prof. Dr. Muhammad Munir.

Conference Keynote Speeches

1. GLOBALIZATION AS INNOVATION IN EDUCATIONAL RESEARCH

Prof. Dr. Bill Atweh

Visiting Professor Philippines Normal University and Adjunct Professor
Curtin University, Australia

Prof. Dr. Bill Atweh, spoke about globalization as innovation in educational research and said that many developing economies around the world are adopting policies towards internationalization of higher education, and in particular in their research activities. Discussing the development of this concept, he said that concerns about internationalization of higher education in Western countries have commenced in the 1990s and have intensified in the new millennium. He argued that developing countries can benefit from lessons learnt from other countries on how to advance their research quality but also should be critical of the negative effects of internationalization in making research less relevant to their local conditions, needs and capacities.

He highlighted globalization, as a phenomenon giving rise to intensive internationalization, is not a singular concept, is not out of control and is not necessarily bad or good. In particular it does not necessarily lead into homogenization of culture and research and the loss of the local and unique character of the context. He recommended that we need to be critical about the assumptions behind it and the possible forms and directions it may take. Explaining the concept of globalization and internationalization, he said that the word globalization is an amalgam of two words including local and global. He argued that how research focus on local conditions and needs, but using global diversity in knowledge can be globally participatory (to avoid the use of the term competitive) and yet locally relevant. He explained the term by giving example of difference between complex and complicated systems. He said that, complicated systems can be planned and predicted. Complex systems can be influenced and directed but not predicted and controlled such as Educational policy is a complex system that we pretend it to be complicated because we want/need to manage it.

He stated that internationalization has desirable and undesirable outcomes that are unpredictable; therefore, internationalization is Under-Theorized yet Over-Emphasised. For some people, internationalisation has become a “mantra” in higher education and has been promoted with “sink or swim” urgency (Tadaki, 2013). Knight (2011) warns that internationalization has become “a catchall phrase and losing its meaning and direction” In the previous 3rd Global Survey more than half of the respondents came from North America and Europe; so, the report findings showed that there are regional variations in focus and in the Asia Pacific region and North America the top ranked benefit was increasing students’ international awareness while in Europe and the Middle East, institutions hoped to improve the quality of their teaching and learning . He said that in English speaking countries, it is intrinsically related to international students as financial benefit to the country.

He explained his discussion by the region of the world and reported that sub-regional (i.e. the Northern and Southern Asian) collaborations were the preference by

all universities. However, the Northern Universities gave equal priorities to international collaborations, in particular with the United States being the most desired partner (JICA Research Institute of Japan). In Southeast Asia, regional collaborations, Singapore, Hong Kong and Malaysia plans to become education hubs. International opportunities being available only to students with financial resources. Big business developed around student travel and exchange. He said that Trondal (2010) makes a distinction between internationalisation policies at university governance level (H1) and the initiative of individual faculty in international projects (H2). While concluding his speech he said that to be locally responsive and globally competitive, Research has to be first, authentic and indigenous and relevant to local context and suggested that don't accept research results internationally without critique. Start with local big problems that you face in your country. Reflect local conditions, traditions and values of people locally and focus on dissemination locally. He concluded his speech with his message to the students "Change paradigm of global completion to paradigm of global participation".

2. WORKABLE FRAMEWORK FOR DISTANCE EDUCATION PROGRAM IN PAKISTAN

Dr. Waheed Noor

Director, Directorate of Distance Education, University of Balochistan

Dr. Waheed Noor Director, Directorate of Distance Education, University of Baluchistan gave his keynote speech about workable framework for distance education programs in Pakistan. Dr. Noor discussed issues and challenges for the people of Baluchistan in this regard. He said that access to quality education and lifelong learning found its latest instantiation within the Sustainable Development Goals (SDGs), Goal 4. Information digital technologies have fostered a rapid expansion in recent years, a significant driver of change has been the dramatic rise in the use and availability of new educational technology that have been opted by educational institutions across the globe. He emphasized the need of Blended mode of education in Pakistan and for this purpose explained the process which consist of four pillars of dual mode of education, the frame work for distance education and process monitoring the remote centers of education. Currently, distance education has emerged as a mode of study for HEI's student which provides flexibility for non-traditional students; whose employment, health, family or other circumstances are not conducive to a traditional academic schedule through partly teacher-student interaction and partly online learning using learning management system (LMS). He said that in existing mode we have 5% accessibility in Baluchistan due to demography and the type of settlements. So the Distance education can be used as it needs no formal Policy but can be made beneficial by LMS interaction and proper distribution of Credit hours between different modes.

This blended mode of education exploits the benefits of both online learning & asynchronous engagement, and traditional face-to-face interaction whereas compensates the demerits of each other. The ambition for distance education to quality education and lifelong learning (a key attribute of 21st century university model) is evident but the means to make it happen, especially in Pakistan, is not clear and challenging as well such that there are existing four well established modes of education such as, traditional formal education, private education, open education and virtual learning. For making the open education more flexible, he used the term,

“Distance Education” and suggested some ways to improve the effectiveness of the distance education. He said that we need, Blended curriculum, Blended interaction, Blended Assessment and Remote center Monitoring and Proctored examination.

While explaining about the benefits of this process, he said that this process will be helpful for promoting student engagement, improving student-teacher interaction, strengthening learning achievements, self-paced learning, sustained learning experiences, E- vigilance and monitoring and enhanced student performance. He said that the Blended Curriculum contains two concepts: Core concept (teacher focused) which is a face-to-face interactive study with key features as, improved understanding of the concepts, independence, motivation ,self- study and soft component (learner- focused). This is the component of independent study and LMS based study and the key features are, integrated knowledge, improved understanding of the concept, and enhanced self- confidence.

While explaining the blended interaction Dr. Waheed explained that, Blended interaction contains 30% face to face interaction which is needed for personal satisfaction, 30% LMS centric interaction which is a real active learning and it can create the flexibility for time and resources usage and management and 40% Audio/Video interaction. Blended Assessment can be done in both ways, i.e. class-room assessment and LMS based assessment. Blended interaction has the following benefits: self -directed learning, improved self-esteem, improved problem solving cognitive skills, in-depth study of material abilities to recognize and recall the content and responsibilities (to create the sense of responsibilities). Remote Center Monitoring can be done by personal or physical visits of the monitor Web media monitoring such as Skype, WhatsApp, or other video call sources CCTV cameras can be used E-vigilance monitoring etc.

Moreover, non-existence of proper distance education policy and inadequate infrastructure in remote/rural areas makes this program more vulnerable. To address this apparent gap, this paper innovatively proposes an absolute and sustainable distance education framework that addresses the four pillars of blended education, i.e. self-study, teacher student interaction, ubiquitous access and integrated knowledge that have been ignored in past studies and make distance education workable. The constituents of the proposed model includes: blended curriculum, student-teacher face-to-face and LMS centric interaction, blended assessment, examination, and remote monitoring. The proposed model provides clarity in content delivery in blended environment, effective and efficient use of LMS by teacher and students, e-vigilance and quality assurance.

While concluding his presentation he said that in Baluchistan and other remote areas of Pakistan can get the benefits from this Distance education system and some of the benefits are as follows Value addition in learning, Life- long learning can be made possible, Incentive seekers can be satisfied, Quality assurance can be done, Accessibility can be assured, scaling-up the process of literacy program can be achieved.

3. PROFESSIONAL ASSERTIONS ON RETHINKING TEACHER EDUCATION IN PAKISTAN

Prof. Dr. Mehmood-ul-Hasan Butt
Advisor, HEC, Islamabad

Prof. Dr. Mehmood-ul-Hasan Butt discussed about professional assertions on re-thinking teacher education in Pakistan. He said that it was time to reflect and rethink what were the salient attributes of a teacher that we all need and then to discuss the processes through which to prepare them, because as Al-Ghazali has pointed, “Knowledge without action is wasteful and action without knowledge is foolishness.” A great teacher was sent to mankind more than 1400 years ago with a book of guidance to reconstruct individual human nature and to create social institutions that promised a just and progressive social order. He spent his life to instruct, inform and inspire his people and mankind at large, to cultivate virtue in all its manifestations. He explained the four processes, Fikr, Aqal, Ilm and Amal which are the means to create shining, successful, prosperous civilizations, which once was ours. The challenge now is how do we create Darul-Hikma, Madrassa-tul-Nizamia and other similar schools of thought and action that produced the philosophers like Ibn Arabi, Al-Farabi, Al-Ghazali, Mathematicians like Al-Ghazali and Khayyam, Original thinkers of medical scholarship like Avicenna, Averroes and others who discovered and disseminated the scientific method of creating useful knowledge, Ibn e Khaldun, the father of Philosophy of history, sociology and cyclical process of rise and fall of civilizations. Concluding his keynote speech he said that the rethinking and reflection is continuing and cadres of scholar-teachers are being prepared for this purpose. “Those who look for seashells will find seashells; those who open them will find pearls.” Al Ghazali. Let us decide what do we want, Seashells or Pearls?.

4. CHANGING TIMES AND CHALLENGES OF MEANINGFUL EDUCATION

Prof. Dr. Riaz Ul Haq Tariq
Chairperson NACTE

Prof. Dr. Riaz ul Haq Tariq discussed about Changing Times and Challenges for Meaningful Education in Pakistan. He discussed the facts and figures to show the present condition of the institutes regarding quality of public sector school education.

According to Dr. Tariq, education in Pakistan is facing serious threat of poor quality and irrelevance with present time. Teachers/educational institution especially public have not stood up to the challenge of time. Pakistan is experiencing its most serious threat in history and that is “trust deficit” of employers. Our graduates are not innovative and inventive to the level required in knowledge economy era. He further said that it was easy to understand the causes of this situation. He pointed out the challenges faced by the teachers. Teacher Education has lost the trust of Govt. in this country. They have started recruiting untrained graduates. A survey revealed that product of teacher training institutions generally lack in Communication skill, knowledge domain, IT Skills, in addition to professional commitments and ethics. Salaries and benefits are better in public sector as compared to average private sector but the outcome is poorer. Leadership is generally weak in public sector as

compared to private sector. Public sector heads have attended more trainings than private sector heads. Innovations in Education are kept away in our system and our exams have lost relevance with the global world.

Major Higher Education challenge in Pakistan is Quality of Our graduates .Out dated curricula of universities, poor curriculum delivery and compromised examinations. Researches produced are of incremental nature only. Students entering university are deficient in skill like language & IT.

Curricula are deficit in three very essential skills namely communication, digital fluency and mentoring in addition to some others as well. Teachers have been found weak in developing applications of acquired knowledge in general. It is accepted reality that examinations drive quality of teaching learning process, and weak and unreliable system produce any of students which are not suited to the present day requirement of global world.

The result is Pakistan is almost left out entity in the global knowledge economy. The situation requires serious re-addressable and that too when fourth industrial revolution is already captured the world. Our institutions are not serious in adopting the technology developed in present time. A mismatch of what is produced and what is needed in the present world is the outcome. This is produced and what is needed in the present world is the outcome. This generated uncertainty and dissatisfaction among youth. Resultantly, unemployment is rampant and multitude of social problems has generated existential threat for our society. Challenge has become too big and leaders have still to awake

Talking about the 21st Century Challenges he said that the velocity of disruption and the acceleration of innovation are hard to comprehend or anticipate like future uncertainty, turbulent future, terrorism threats, environmental degradation, and financial crises. He said that Fourth Industrial Revolution which was the thrust of Artificial Intelligence (AI) and Robotics. More are automation, Genetic Engineering/ Biotechnology Nanotechnology and Autonomous. And due to its impact the Almost half of current job activities can be automated. So we have to reconsider and critical skills needed such as critical thinking, communication, collaboration and teamwork. complex problem solving, creativity emotional intelligence, global awareness, financial, economic, business and entrepreneurial literacy, civic literacy, health literacy, environmental literacy, computational thinking, judgement, decision making, service orientation, negotiating and cognitive flexibility are also very important skills to be mastered. So while conveying the advice to the national leadership he said that fund education appropriately and craft appropriate policies. Implement merit & accountability as result institutions will start delivering otherwise face economic decline.

5. IMPACT OF TECHNOLOGICAL INNOVATIONS ON DEVELOPING PEDAGOGICAL PRACTICES AT UNIVERSITY LEVEL

Prof. Dr. Parveen Munshi

Vice Chancellor

University of Sufism & Modern Sciences, Bhattshah, Sindh

Prof. Dr. Parveen Munshi talked about impact of technological innovations on developing pedagogical practices at university level. She said that quality in teaching and learning was the demand of present era. Teachers are supposed to have updated knowledge and skills regarding use of technological innovations for uplifting teaching and learning process. It is an educational technology, which is a systematic organized process of applying modern technological innovations to improve the quality of education. It includes utilization of different types of instructional materials, networking tools, softwares, digital library, internet, smart phone, soft boards, tablet, e-learning materials like e-books, slides and projectors. It is also an application of several instructional materials, methods, techniques, strategies and skills according to the needs of students.

She also discussed the importance of the use of instructional technology and said that it motivates and engages students to learn and broaden their knowledge. Owing to utilization of these instructional aids in classrooms and computer labs, tremendous revolutionary changes has been taken place and are going to enhance teaching and learning process to meet the demands of students. She stressed upon the use of Technological innovations for developing pedagogical practices of university teachers and said that it can be carried out through examining teachers and students' perceptions regarding use of technological innovations at higher educational institutions. Pedagogical practices are associated to technological innovations those are happening in the field. Technology innovations support teachers in managing and developing pedagogical practices. It helps teachers to select various pedagogical techniques to improve teaching process. Talking about Pakistani scenario she said that in Pakistan, there is a big space in the field of modern technology and innovations related to pedagogical skills at all levels. Students and teachers have to face many problems regarding a using technological innovation, which has direct impact on improving their performance. It was observed that technological innovations have positive impact on teaching and learning process.

6. INNOVATION IN ASSESSMENT OF LEARNING: NEED OF 21ST CENTURY

Prof. Dr. Razaqat Ali Akbar

Director Institute of Education and Research, University of the Punjab

Prof. Dr. Razaqat Ali Akbar, Director Institute of Education and Research, University of the Punjab talked about the "Innovations in assessment of learning and the need of 21st century". He said that, the 21st century is the century of transformation of educational practices in Pakistan to achieve the goal of quality education in the country. It requires the paradigm shift from teacher centered teaching to the active involvement of teachers and students towards students' continuous learning process.

Highlighting the importance of assessment in education, Dr.Akbar said that assessment of learning was vital in teaching learning process to transform education as a quality process. Assessment is continuous, ongoing process for collecting information about the achievement of desired learning outcomes of students. It allows teachers to measure effectiveness of instructional strategies which leads towards its improvement. Assessment provides reliable records/information to students, their parents and schools' heads about weaknesses and effectiveness of teaching strategies used by teachers in teaching learning process of classroom. Classroom assessment techniques are adopted to strengthen entire teaching learning process to enhance students' learning qualities. Thus it is needed that teachers may adopt the innovative assessment practices rather than conventional practices. Teachers need to follow direct and indirect methods to assess students' SLOs by asking students to demonstrate and reflect upon their learning. Direct assessment methods: classroom test, essays, quiz, classroom presentation whereas indirect assessment methods: surveys and interviews may be used. Teachers are required to use assessment techniques to gauge students' learning abilities, conceptual understanding, logical thinking, question answer and problem solving skills.

He emphasized that diversity in assessment techniques including Baseline Assessment, Embedded Assessment, Oral Reports, Students Reflection and Quizzes to summarize or rephrase essential points of topics were effective for assessment. Think Pair Share given by teachers' free minutes to students & re-evaluate important questions quickly to discuss & share with assign peer and then disclose with entire class. Teachers conduct interviews to assess individual and group performance before, during and after science experiments. Observation is also formative technique used by teachers to get frequent feedback about students' learning and their responses towards teaching approaches. The assessment techniques that are used at both formative and summative stages are performance tasks to take actions about students' problems, issues or scientific concept. Checklists are also used by the teachers to supervise and record the anecdotal information of students. Investigative Projects help teachers to explore problems concerns of students. Extended or Unit Projects are used as assessment techniques by teachers in an open ended setting to check application of knowledge and skills of students. E-Portfolios assist teachers to collect purposeful data about students.

7. ARE OUR GRADUATES READY FOR THE PROFESSION? CLINICAL SIMULATIONS TO FOSTER THE DEVELOPMENT OF CRITICAL COMPETENCES IN HIGHER EDUCATION?

Prof. Dr. Martin Valcke

Department of Educational Studies, Ghent University
Gent, Belgium

Prof. Dr. Martin Valcke from Ghent University, Belgium delivered his virtual presentation and in his keynote, the focus of speech was on readiness for the profession, and employability of graduates from higher education. Higher education has proven to be successful in transferring the foundation knowledge needed for future careers. But key questions are being asked whether graduates are "competent". Can they work in teams? Can they function independently in veterinary surgery? Can they identify problems next to solving problems? Can they cope with aggression?

Building on examples from the medical, veterinary and social sciences, we present innovative approaches building on clinical simulations. He demonstrated how both face-to-face and online clinical simulations have the potential to develop even in very large groups of students - competences that are considered difficult to develop and that are often lacking in graduates.

He showed a video clip entitled “Foaling in Horses” and introduced the need to pay more attention to a systematic development of “complex competences” then explained the critical voices about “outcomes” and “graduates” of higher education discussed the key problem: complex competences, nature of competences and learning trajectories. He said that key problem or complex competences build on integration of knowledge, skills and attitude and this integration requires a build-up of conditional skills and demands from students to pay more attention to higher level. Then he used the example of teacher education for nature of competences. He discussed that as a starting point following steps need to be taken: identification of critical mastery specific competences, dealing with parents, classroom management, dealing with aggression, bullying, and giving good feedback. His focus was to learn new techniques for teaching the new teacher how to deal with the problems which are obvious for them to face in the near future professional life.

8. IMPROVING THE QUALITY OF EDUCATION VIA A KNOWLEDGE MOBILISATION STRATEGY FOR ACHIEVING UNESCO SUSTAINABLE DEVELOPMENT GOAL (SDG4C)

Prof. Dr. Sarah Younie
De Mount fort University UK
(Skype Session)

Prof. S. Younie started her speech with explaining the UNESCO SDG 4C to improve the quality of teaching and used the reference to show the challenges that “this will require the creation of knowledge-rich, evidence-based education systems, in which school leaders and teachers act as a professional community with the authority to act, the necessary information to do so wisely, and the access to effective support systems to assist them in implementing change.” Ischinger, B. (2009:3)

Dr. Younie said that teachers and policy makers have no access to a dynamic, quality assured knowledge base as do legal & medical professionals, current online educational research reports do not meet the need and this impacts negatively on practice, student outcomes and communities, therefore, UNESCO say updating teachers is problematic in all countries: 1.9b children, 29m teachers but Governments want to move to evidence-informed teaching

After that she explained the concept of Translational Research and said that Translational research (TR) was a systematic approach to turn research knowledge into practical applications for professional practice which provides a bridge between researchers and practitioners. It created new form of publishing in the form of knowledge maps or MESH Guides, which translate the findings of research into practical outcomes.

MESH is a global initiative involving educators in building quality assured research summaries for professional practice – UNESCO & OECD endorsed but it Need For Knowledge Management (Km) System in ED. MESH, Mapping Educational Specialist know How is a new form of web-based publishing, using

concept maps supported by communities of practice and editorial boards assuring quality and translating research findings to practical applications (concept to classroom) to overcome fragmentation between research & practice while mobilizing knowledge . It makes teaching as a research & evidence-informed profession.

9. LEADERSHIP IN 21st CENTURY

Professor Dr. Muhammad Khan

Professor of Politics and International Relations-IIUI

Professor Dr. Muhammad Khan discussed leadership in 21st century and explained that while in a challenging position, a leader has to lead from the front, whereas, in reaping the fruits of a success; ask his followers to be in the forefront to receive the prize. Nonetheless, leadership is all about translating the capacity of the vision into reality'. It is the leadership of a leader which defines 'what the future should look like, aligns people with that vision, and inspires them to make it happen, despite the challenges and constraints in the process. Discussing about the various aspects of leadership he said that in fact, the leadership is both a research area and a practical skill, encompassing the ability of an individual or organization to lead or guide others. Compare to political leadership, in academia administrative responsibilities are taken over by one of member of the faculty at a time, which perform managerial jobs. By virtues of administrative position, this academician needs to be resourceful scholar. Another feature of the academic leadership is its time-restricted mandate, since none of the positions in the administrative hierarchy is permanent, which poses a challenge typical for all limited positions, namely the difficulty of formulating and implementing long-term goals and far reaching transformations.

At time, no one would like to take some unpopular decisions during one's administrative mandate knowing that someday, sooner or later, they will be reversed. Yet another component of the academic leadership conundrum is the normative component of the academic culture. Indeed, good academician is one who undertakes research through innovative approach, resulting into new knowledge. Taking on an administrative duty means reducing the time left for research. Highlighting the 21st century challenges Dr. Khan said that, "21st century presents many new challenges for both leaders and followers". He recommended that in a globalized, interconnected and highly fast moving world, there was a requirement to learn cognitive flexibility, stress tolerance, and divergent thinking, besides, establishment of trust and establishing long-term relationships. Thus, the future leadership must have novel ideas, willing to take risks, inspire and motivate others and build new strategic partnerships to address the challenges. He highlighted the challenges facing the 21st century leadership with a primary focus towards academic leadership.

10. FORMATIVE ASSESSMENT AS INNOVATIVE TOOL OF LEARNING

Prof. Dr. Arshad Ali

IER, University of Peshawar

Prof. Dr. Arshad Ali talked about formative assessment as innovative tool of learning and explained that learning as a process of bringing permanent change in the behavior of individual due to experience. While explaining the process of education

he said that teaching/education process is a circle of objectives, assessment, content and methodology. The process starts from objectives and end at the assessment of objectives, therefore, assessment is an integral part of the education system. It determines the nature and extent of students' learning and development. The most commonly accepted interpretation of assessment in education and training claims that "assessment is the process of gathering, recording and using information about a learner's response (performance /achievement) to a task". He Defined the term "assessment" as a Latin verb 'assidere' meaning 'to sit with.' in assessment one is supposed to "sit with" the learner. This implies it is something we do *with* and *for* students and not *to* students (Green, 1998).

According to Dr. Ali, the Balanced Assessment System document indicates the variety of assessments that are currently in use to guide the process of designing and delivering instruction. Highlighting Types of Educational Assessment, he said that Educational Assessment depends upon its purposes such as it provide answers to different questions, address different users and have varying implications for an assessment system. On the basis of functional role in classroom instruction, there are four types of assessment, namely, Placement Evaluation, Formative Evaluation, Diagnostics Evaluation and Summative Evaluation. Formative Assessment, also called Assessment for learning, Taken at varying intervals throughout a course to provide information and feedback. Formative Evaluation is used to monitor learning progress during instruction. Its purpose is to provide continuous feedback to both pupil and teacher concerning learning successes and failures. Feedback to pupils provides reinforcement of successful learning and identifies the specific learning errors that are in need of correction. Feedback to the teacher provides information for modifying instruction and for prescribing group and individual remedial work. To identify the learning errors and to take remedial measures, consequently improving learning is the prime purpose of formative assessment. The result of formative assessment is not typically used for gradation and certification purpose. While explaining Formative Assessment he said that it is used for Clarifying and sharing learning intentions and criteria for success. Engineering effective classroom discussions, questions, learning tasks, provide feedback that moves learners forward, activating students as the owners of their own learning and activating students as instructional resources for one another. Main thing is that, It's about helping students move along a progression to higher levels of learning. While talking about its Implications for classroom practice he said that, being confident that every student can improve. He recommended that creating a learning environment which supports a partnership between teacher and students. Using assessment to inform teaching and learning.

Sharing assessment results with students and constructing clear and accessible learning goals with them. Clarifying or co-constructing learning outcomes and ensuring that students understand them and providing feedback that helps students recognize their next steps and how to take them. At the end of his speech he gave some Recommendations such as Continuous Professional Development (CPD) for teachers on formative assessment and feedback, Formation of academic council/ committee to help teachers in providing feedback, To know and practice the formative assessment and teachers' feedback needs to be more specific, brief, clear, and comprehensive and should not be based on passing general statements.

11. ENHANCING EDUCATIONAL PARTNERSHIPS: HOW THE U.S. AND PAKISTAN CAN WORK TOGETHER TO REFORM EDUCATION AND TEACHER DEVELOPMENT

David J. Roof
PhD Ball State University, USA

David J. Roof talked about enhancing educational partnership between US and Pakistan for educational reforms and teacher development. First of all, he explained about International Partnerships & Collaboration and said if education policy and practice are to better meet needs in the next century, international - partnerships are a necessary component and we need to develop partnerships that focus on major development challenges and provide the greater impact.

In his presentation, he examined the education partnerships between the U.S. and Pakistan by using research from projects funded by the Enhanced Partnership with Pakistan Act of 2009, which sought to transform the relationship between the United States and Pakistan from a transactional approach. The Act had prioritized democratic governance, economic development, and investment in people. The Act intended to facilitate access to education for all children in Pakistan, and especially for young women and girls, in order to raise literacy rates and decrease drop-out rates. Another related focus was teacher education. He examined the partnerships formed through this act, and other approaches. For example, the U.S. teacher organization, the American Federation of Teachers is working with teacher training centers in Pakistan to enhance teacher development and teacher effectiveness. This organization is working to bring a free online resource that shares more than 200,000 lesson plans from teachers across the U.S., to Pakistani counterparts. This partnership has sought to invite Pakistani school network leaders to attend an annual teacher's conference that hosts dozens of professional development workshops. The organization is also exploring ways to send teachers to Pakistan to conduct joint professional development workshops with teachers and establish peer mentoring relationships with U.S.-based teachers.

He presented a critical analysis of these programs, and recommended ways of improving on them by giving additional example. He said that there were potential approaches that might better utilize internet technology to improve inter-cultural understanding among Muslim majority countries and the United States. Lahore University of Management Sciences students participated in this type of program in 2011 and 2012 gave very positive feedback. The program is now expanding to include Edwardes College in Peshawar. He also highlighted the Importance & Challenges of International partnerships that could be beneficial to all. According to Dr. Roof, the ability to scrutinize, debate and share experience is essential for academic and scientific accomplishment. Constructively challenging accepted opinions and ideas is central to our development, and international collaborations help to facilitate this. Explaining the concept of partnerships and collaboration, he said that partnerships and collaboration can be viewed in terms of two dimensions, the mode of delivery and partner responsibilities. Consequently, international partnerships can take a number of different forms; however it is the relationships that develop between the sides involved in the partnership that is of interest in my research.

Effective relationships depend on a number of other key factors, including adequate resources, the construction and implementation of well-written contracts, the development of explicit quality assurance and teaching and learning strategies, and the use of appropriate decision-making models. He explained that American Federation of Teachers is working with teacher training centers in Pakistan – Developments in Literacy (DIL) and Ali Institute of Education – The project worked on teacher training centers in Pakistan to enhance teacher development and teacher effectiveness. This organization is working to bring a free online resource that shares more than 200,000 lesson plans from teachers across the U.S., to Pakistani counterparts. This partnership has sought to invite Pakistani school network leaders to attend an annual teacher’s conference that hosts dozens of professional development workshops. The organization is also exploring ways to send teachers to Pakistan to conduct joint professional development workshops with teachers and establish peer mentoring relationships with U.S.-based teachers. Focusing on Effective International Partnerships he said that Effective partnerships must be cultivated in such a way as to seek maximum participation. Furthermore, the relationship must be based on the capacities and skills that each partner brings to the project. Finally, the relationship must allow for capacity building to occur, so that effective skills and knowledge can be enhanced and adapted to the changing environment.

He highlighted the importance of trust in mutual partnership and said that Trust is 'the belief, expectation, confidence or perception that another party's motives and intentions are honorable, and that they will behave with integrity. As a result, we are willing to rely on that other party in an exchange relationship in order to achieve positive outcomes. In relation to international education partnerships, trust could be defined as an orientation - based on the faith or confidence that the overseas education provider will act with integrity - which will allow the university to increase its vulnerability to the overseas education provider. On the other side of the dyad, the above would be reversed; an orientation - based on the faith or confidence that a university will act with integrity - which will allow the overseas Then he showed the various modes of participation. He concluded that however, the growth of new partnerships that seek to increase the number of students will need help from a series of partners, as well as a strong commitment from the top leadership in Pakistan and the United States. Such partnerships will need coordination to leverage support and networks.

12. MODERN LEARNING TOOLS AND THE ROLE OF TEACHER

Prof. Dr. Munawwar S. Mirza

Ex-Chairperson, NACTE

Prof. Dr. Munawwar S. Mirza spoke about modern learning tools and the role of teacher. She said that digital technologies are rapidly changing the teaching-learning landscape around the globe. The technologies include but are not limited to internet and related communication software including smart phones and robots for classroom and individualized instruction. It is apprehended that technologies may replace the teacher. Similarly, echoes filled the air a number of times since the 7th decade of the last century at the advent of each technology such as radio, TV, audio/video cassettes but none of the technologies have come to take the place of the teacher.

Stressing upon the merits and demerits of technology, she said that technologies not only increased access to information but they also increased disinformation and stress among the learners and could create further inequities. Thus, teacher remains the nucleus to provide guidance with human compassion so central to human learning and development. She recommended that teachers should be trained to realize their changing role, using digital technologies with a view to supporting learning and improving quality of education. They should also be trained in reducing the isolation effect of technologies on the learner through promoting collective, collaborative and problem solving methods for the benefit of individuals ensuring sustainable development of societies. She also discussed the emerging role of teacher, approaches for effective use of technologies, and requisite pre-service and in-service teacher preparation for this purpose.

13. INNOVATION IN TEACHING & LEARNING: SEVENTY YEARS OF EDUCATION: HISTORIC PERSPECTIVE
Prof. Dr. Mahr Muhammad Saeed Akhtar

Dean Academics
ISLAH International, Wahdat Road, Lahore

Prof. Dr. Mahr Muhammad Saeed Akhtar presented a historic perspective of innovation in teaching & learning and seventy years of education in Pakistan. Displaying the facts and figures of Pakistan, he said that Pakistan was the 6th most populated country according to the 6th Census 2017. While discussing about the aims our forefathers foresee for Pakistan Dr. Mahr said that our forefathers aimed the enforcement of sovereignty of Allah Almighty, establishment of Islamic democracy, revival of Muslim image and identity, Protection of Muslim culture and civilization, Two Nation Theory, economic prosperity and emancipation from the prejudicial Hindu majority. He analyzed how education system of Pakistan is influenced by pre-independence education and referred the charter Act 1813, Macaulay's Minutes 1835, Wood's Dispatch 1854, Hunter Commission 1882, Sadler Commission 1917, Hartog Committee 1929, Abbot and Wood Report 1937 and Sargent Report 1944.

He also discussed article A25 which was inserted into the constitution that read "Right to education: The state shall provide free and compulsory education to all children of the age of five to 16 years in such manner as may be determined by law." He also highlighted the good efforts done for education reflecting in Education Policies 1947-2009 and referred All Pakistan Educational Conference 1947, Commission on National Education, 1959 (Sharif Commission), New Education Policy 1970, The Education Policy 1972-78, National Educational Policy 1979, National Educational Policy 1992, National Education Policy (1998-2010), ESR 2001: Quality Assurance, Examination reforms (private boards) National Assessment Centers, National Education Policy 2009, New Education Policy 2017, Five Year Plan from 1955 – 15, Vision 2025 but despite all these efforts Pakistan is still struggling to achieve quality education.

He discussed that Pakistan has been successful in making attractive policies for the improvement of education sector, but due to negative intentions of politicians, improper implementation and not good governance there is no practical demonstration of these policies and as a result Pakistan is at 160th rank among the total countries of the world. We are a dropped out nation 3rd at bottom in ranking in drop out. He also

highlighted the steps taken by HEC-Higher Education commission to improve education sector and referred that Billions and billions has been spent on College Education Reforms (BS programs), Universities, Teachers education but still the access to higher education in Pakistan till 2010 was only 5% as compare to advanced countries that is 50% . He said that according to the Primary and Secondary Education Committee Policy 1947 the Primary and Secondary Education Committee “considered it essential that a national system of education should be based on the strong foundations of free and compulsory primary education”. It proposed separate pre-primary and primary education stages for children of ages 3 to 6 and 6 to 11. He highlighted some important issues about state of Education that goals and aims of Education are not achieved by teachers because they are in worst conditions in jobs. He recommended following major Reforms for education that is: teaching Qura’n from grade 1 – 12, Ethics, moral education and Haqooq-ul-Ibad included, curriculum upgraded to ensure latest developments/ ideas in science and technology, information technology / computer education from class- vi, all duplication in subjects eliminated, contents do not reflect thinking of any particular sect / school of thought. New subject groups should be introduced in colleges and Format of the question papers for the Board examination need to be revised. NAVTECT established to ensure the establishment of Vocational Schools at each Tehsil and at industrial clusters. All dropouts from schools be encouraged to enroll. Teacher’s status improved recruitment of female teachers given priority. National textbook policy need to be formulated

The ministry of education completed first ever national education census, which is a milestone in the history of Pakistan as its outcomes provide a comprehensive picture of education in Pakistan and complete enumeration of all the categories of educational institutions. He stressed upon innovation in learning and highlighted the key factors for the development of any country that is teacher (teacher training programs), nature of content and mode of evaluation. He recommended that there must be innovation in teaching & learning such as integration of Islamic ideology in education, taking education as a priority, establishment of think tanks, involvement of real stakeholders, long term planning (with legal protection), good governance, updated curriculum & textbooks, teacher training and monitoring implementation.

Parallel Session I

Session Chair: Prof. Dr. Mumtaz Akhter

Moderator: Samina Rafique

Venue: Room 1

Time: 2:30pm to 4:00pm

S#	Paper ID	Name of Presenter	Title of the Paper	Significant Findings	Significant Recommendations
1	074	Dr. Saleem Ullah Jundran	Rhymed English Translation of Oriental Language Na'at Poems: The Comparative Purview and Scope for Compulsory English Curriculum Na'at Content Selection	<p>Out of total five batches - 50 Na'at poems initial selection, 27 were found as the original English language written Na'ats and 23 were the English translated Na'ats.</p> <p>The proportion of English translated Na'ats into the pool of initial Na'at selection for English curriculum grade six to ten was found 46%.</p> <p>Fifty-four percent initial Na'at selection proportion consisted of original English language written Na'ats.</p>	It implied that good translation of masterpiece oriental poetical literature might be duly considered for content selection of English curriculum.
2	045	Faiza Zaheer	Bridging the Linguistic Gap Between Thinking and Speaking in English in Pakistani Students	<p>There is a need to train students to think and speak in English.</p> <p>Instructors have to polish the imaginative and creative skills and the abilities of the students to bridge this gap which is a hindrance for them in speaking English correctly and effectively.</p>	

3	027	<p>Ms. Hajra Bibi Lecturer, Education Fatima Jinnah Women University, Rawalpindi</p> <p>Ms. Aisma Bibi Associate Lecturer Education Fatimah Jinnah Women University, Rawalpindi</p> <p>Ms. Farkhanda Jabeen Lecturer, Education Fatima Jinnah Women University, Rawalpindi</p>	<p>Fostering Collaboration Between Schools and Universities: Opportunities and Challenges</p>	<p>Collaboration is very important for the prospective teachers' training and to familiarize them with the system. It leads to sharing of good practices and innovation with the in-service teachers.</p> <p>Formal agreement between both institutions can lead towards serious efforts from both institutions for successful training of pre-service teachers.</p> <p>A few regular teachers remain free in those days (and wait for the completion of their practice) when prospective teachers join school for their practice. Their completion of syllabus and sometimes other relevant process suffer due to which they feel uncomfortable due to the arrival of prospective teachers in schools.</p> <p>Negative remarks of the school staff become the source of irritation and give us feeling about our efforts as worthless contribution in the institution.</p> <p>Concerning bodies of school or university may be reluctant because of additional workload associated with the collaborative activity, such as meetings, visits and arrangement of workshops.</p>	<p>There should be formal agreement between concerning authorities of university and school regarding teaching practicum to make collaboration meaningful.</p> <p>Orientation meeting should be arranged between school staff and concerning department of the university (concerning prospective teachers should also be part) to develop professional relations between both institutions.</p> <p>University should share the worth of teaching practicum with school principal and staff so that they can play their role accordingly in the accomplishment of teaching practicum in order to achieve desired</p>

Sr.#	Paper ID	Name of Presenter	Title of the Paper	Significant Findings	Significant Recommendations
1	128	Syeda Madiha Wajid MS Student International Islamic University Islamabad	Quality of Classroom Assessment & Feedback as Perceived by Students of International Islamic University Islamabad	The study leads to the conclusion that the university teachers need to improve their knowledge of assessment techniques and quality practices and if a teacher uses feedback from observation and completed assignments to inform future instruction, this information will certainly have a positive effect on student learning. Modifying instructional strategies in response to assessment not only enhances students' learning but also develop instructional skills of the teacher.	There is a need of building up assessment literacy and Higher education teachers need professional and practical support for developing assessment skills and strategies ultimately helping students to improve their learning. There is also need of modification in instructional strategies and proper feedback on assessments are required.
2	171	Tariq Mehmood, PhD Scholar, IIUI, Islamabad, Sahibzada Waqar Ahmad, PhD Scholar, IIUI Islamabad,	Assessing Flipped Classroom Strategy Formatively on Students' Achievement at Secondary level in the Subject of	The results show that there is no significant difference between the experimental and control groups in their means in the pretest, which indicates that both the groups were equated properly. It appears from the results that there is significant difference between the	On the basis of the results, it is recommended that the flipped strategy with formative assessment may be used as integral part of teaching learning process. It is recommended to apply flipped strategy with formative assessment in the classroom particularly in the

		Fazal Hakim, PhD Scholar, IIUI Islamabad.	Biology	experimental and control groups in their means in the post test.	teaching the subject of biology. Since the use of flipped strategy formatively proved to have significant positive effects on the achievement of the students, the teachers should be trained in the use of flipped strategy with formative assessment and be motivated to use this method in classroom on regular bases.
3	006	Ammara Murtaza, Ph.D. Scholar Institute of Education and Research Prof. Dr Razaqat Ali Akbar, Director Institute of Education and Research, Punjab, Lahore	Hurdles and Fears in Classrooms' Participation: University Students' Perspective	It is concluded from the study that lack of confidence, language barrier, confusion about topic, less habit of reading, peer pressure, influence of the instructor and environmental factors hinder students from classroom participation.	It is recommended that teacher need to ensure the clarity of topic which may increase the confidence of the students to participate in the class. Teacher must discourage peers, who bully, make fun of those who give wrong answer, distract the attention of those students who is trying to participate in the class. The teachers can plan strategies and employ proper techniques to create a responsive classroom environment.

4	112	<p>Munawwar Hussain Qureshi, Lecturer</p> <p>Maryam Tahir, Research Scholar Mirpur University of Science & Technology (MUST) Mirpur AJK</p> <p>Mudassar Hussain, Regional Manager/PhD Scholar, READ Foundation.</p>	<p>Examining the Applications of Bloom Taxonomy in Test Development/Pa per Setting Followed by Faculty Members at Mirpur University of Science and Technology (MUST), Mirpur (A.J.K)</p>	<p>As revealed from this study, test construction is an area that requires more emphasis more so because most teachers are not trained in test construction skills. It is evident therefore that teachers need to be trained in test construction so as to adequately construct test items that would be sufficient in establishing the learning done at all levels of the Blooms Taxonomy.</p> <p>The use of Bloom's Taxonomy can be a very powerful tool in assisting a student to learn at a higher and more critical level. This process does take the tutor a minimal amount of time to think about the phrasing of higher level questions, however, it is easy to integrate this with the content the faculty member is delivering. If a faculty member shifts from a content delivery based process to problem-based learning, the emphasis will move to a collaborative process and provide the student opportunities to develop the concept and critical thinking.</p>	<p>We have proved that our proposed explanation will improve the action verbs into more accurate levels. We also suggested that there is need to incorporate training workshops, seminars and courses to be organized to help faculty members to gain competence in test construction to cover the different levels of taxonomy in order to ensure quality assessment at university level and measurement of higher order thinking skills in students. There is need to have assessment experts to monitor the testing being done at university by the faculty members to ensure quality and uniformity in testing.</p>

1	165	<p>Saima Batool, M.Phil Student Arid Agriculture University, Rawalpindi</p> <p>Muhammad Arshad Dahar, Assistant Professor Arid Agriculture University, Rawalpindi</p>	<p>Comparative Study of Learning of Female Students Studying in the Separate and Co-Education System at University Level</p>	<p>It is observed that there is a highly significance difference of motivation between separate and co-education of students.</p> <p>In some aspect of Anxiety of students in separate and co-education found significance difference and some aspect there is no difference.</p> <p>It is investigate that there is highly significance difference of attitude between separate and co-education of students.</p> <p>In some aspect of concentration of students in separate and co-education found significance difference and some aspect there is no difference.</p> <p>In some aspect of time management of students in separate and co-education found significance</p>	<p>In order to advance female education first and simple step it is very important to boost the attitude of the people toward education and social status of female. It is suggested that public and private area as well as media should play their positive role for the enhancement of female learning.</p> <p>It is suggested that different stakeholders give awareness in the people about the importance of female education.</p> <p>It is suggested that female should be empowered to make decision about their education and social life at their own end to play vital role in the society.</p>

				difference and some aspect there is no difference.	
2	227	<p>Dr. Rizwana Muneer, Chair Person, Department of Education, University of Karachi.</p> <p>Zubia Naz, Teaching Assistant Department of Education, University of Karachi</p>	<p>Teacher as a Leader: Perspectives of Academics at Higher Education</p>	<p>The findings revealed that the teacher leadership is not an isolated phenomenon. It needs joint efforts that foster the crucial role among teachers.</p> <p>Further, lack of collaborative and collegial effort in universities and importance to status quo has restricted the power of teacher as a leader.</p> <p>Therefore, it was concluded that we need a radicle shift from professional competition to collaboration to empower the faculties for the leadership roles at higher education Pakistan.</p>	<p>It is recommended that universities should promote shared accountability cultures within faculty and beyond. Further, professional collaboration and leadership training programmes should be organized to legitimate the power of teacher leader.</p>
3	178	<p>Adila Khanam, Subject Specialist, PhD Scholar, UE Township Lahore</p> <p>Sonia Iram, PhD Scholar, UE Township Lahore</p> <p>Sadia Waqas, Subject</p>	<p>Explore Role of Head Teacher in Enhancing Pedagogical Skills of Teachers</p>	<p>The study identifies the focus on supporting, mentoring and developing teachers' pedagogical skills through evaluating teaching practices and promoting teachers' professional development with the help of pedagogical skills.</p> <p>The results show that Head</p>	<p>It is recommended that administration can adopt pedagogical skills for improving teaching and learning process for getting better results</p>

		Specialist, MPhil Scholar, IER		teachers' pedagogical skills were involved in setting and monitoring teaching goals, providing appropriate resources, supervising the teaching practices by observing and providing feedback to teachers, ensuring a high-quality teaching and learning.	
4	224	Ms. Hina Arzoo M.Phil Scholar, Department of Education, University of Sargodha Dr. Riffat-un-Nisa Awan Associate Professor Department of Education, University of Sargodha	Contribution of Human Resource Management Practices towards the Development of Service Culture of Universities of the Punjab	It was found that HRM practices played a significant role in developing service culture of universities especially empowerment, training, recruitment and selection and teamwork Fatima Jinnah Women University Rawalpindi have strong focus on service culture to provide excellent service to their client and University of Sargodha also appreciates service culture. There was no significant difference between the mean score of HRM practices and service culture of teaching and non-teaching university employees.	University employees' performance should be appraised in time and strengths and weaknesses of employees' performance should be discussed with them to improve service quality in organization. Training needs should be assessed in proper time and training should be provide for enhancement of service quality. Proper feedback should be provided and rewards should be given according to the delivery of service.

5	001	<p>Dr. Fozia Fatima, Assistant Professor, University of Wah</p> <p>Sobia Fatima, Advocate Lecturer, Best Law College, Rawalpindi</p>	<p>Philosophical and Biological Foundation of Brain Based Learning: A Phenomenological Approach</p>	<p>Different school of thoughts such as realism, idealism, materialism, dualism, naturalistic, conscious, unconscious or pseudo-conscious aspect of brain and constructivism were directly related with the brain based learning approach in the teaching learning process. Similarly, teachers do not entirely comprehend the brain biologically because brain discovery is quite a young ground in teaching learning process and teachers have been practicing brain based learning intuitively but they are not able to articulate a clear rationale for their actions yet they are still able to practice brain based learning effectively.</p>	<p>The school authorities should provide opportunities for staff development. Teacher education courses should include theoretical basis of brain based learning and also provide scope for its implementation.</p> <p>As desired by the teachers in this study, they would look forward to a formal training on brain based learning.</p>
6	009	<p>Dr. Quratul Ain Hina, Assistant Professor, Department of Education, National University of Modern Languages, Islamabad</p> <p>Mahek Arshad, Ph.D Scholar,</p>	<p>Effect of Mind Mapping Technique on Student Motivation at Higher Education Level</p>	<p>There was statistically no significant difference found between the male and female respondents regarding the intrinsic motivation of the students.</p> <p>There was statistically no significant difference found on the basis of age regarding the use of mind mapping technique.</p> <p>There was statistically no significant difference found on the</p>	<p>The study recommended that students may be taught how to construct concept maps on their own on various topics because this improves the cognitive structures of the students.</p> <p>The concept maps on all possible topics need to be added in the curriculum and text books as well to make the students and the teachers familiar with the different possible shapes, designs and ideas.</p> <p>Classroom activities related to the</p>

Parallel Session

Session Chair: Dr. Asghar

Moderator: Ms. Javeria Shabbir

Venue: Room 3

Time: 10:30am to 12:00pm

Sr.#	Paper ID	Name of Presenter	Title of the Paper	Significant Findings	Significant Recommendations
1	191	Dr. Farkhunda Rasheed, Assistant Professor Science Education Department, AIOU, Islamabad, Pakistan Sidra Khushnood, M.Phil Scholar Science Education Department, <i>AIOU</i> , <i>Islamabad, Pakistan</i>	Transforming Science Education through Digital Technology	The result shows reflect the positive impacts of the treatment. The results showed students' interest towards science.	It is recommended to use VR for the teaching and learning of science concepts and to make positive students' interest towards science.
2	127	Dr. Zarina Akhtar, Assistant Professor International Islamic University, Islamabad	The Impact of In-Service Training on Elementary School Teachers in the Subject of Mathematics	The content clarity of teachers from Chakwal was already better on pretest. Teachers of both district actively participated in training as performance on post-test was better. It shows training has positive impact on content clarity of teachers in the subject of mathematics. The female teachers' performance was better in Chakwal district and male	Training may be imparted on regular bases and follow-up of training is required. Feedback system may be developed for the motivation of teachers. Incentives in the form of certificate on personal achievement may be given as it can enhance teachers personal developmental level. Teachers meetings may be arranged so that teachers themselves help each other.

				teachers' performance was better in Attock district on pre-test. The female teachers' performance was better in both districts on post-test.	
3	159	Kausar, MS Scholar, IIUI Dr. Zarina Akhtar, Assistant Professor, IIUI	Effect of Response To Intervention on Mathematics Achievement at Elementary Level	Student's taught through response to intervention achieved higher scores in the subject of mathematics at grade 6. RTI based teaching strategy is a helpful teaching practice. RTI based teaching was more useful in increasing students achievement rather than traditional teaching.	As RTI based teaching strategy has a positive effect on the achievement of students, so it is recommended to teachers use RTI as a regular method for teaching students. RTI in Pakistan is yet a new strategy; so it is recommended to Federal Directorate of education training to organize workshops based on RTI for teachers teaching mathematics to elementary classes.
4	204	Dr. Farkhunda Rasheed, Assistant Professor Science Education Department, AIOU, Islamabad, Pakistan Lubna Shaheen	Teaching and Learning Science Through Experiences Using 5E Model	The students of experimental group showed improved scores and motivation for science learning.	It is recommended to inculcate constructivist's approaches like 5E learning cycle approach for teaching learning science and elevating students' interest for science learning.
5	205	Muryem Akhtar Senior School Educator, AIOU Dr. Farkhunda Rasheed Chaudary Assistant Professor,	Use of Innovative Analogies in a Science	The findings of this research proved better thinking skills and high achievement level after incorporation of innovative	Thus, it is recommended to use more analogies for the teaching and learning of scientific concepts.

		AIOU	Classroom	analogies.	This will effectively enhance the interest of learners and help to retain the new knowledge.
6	024	<p>Kinza Amein, Institute of Agri. Extension and Rural Development, Aqeela Saghir, Lecturer Institute of Agri. Extension and Rural Development,</p> <p>Sohaib Usman, Research Assistant Institute of Agri. Extension and Rural Development, University of Agriculture Faisalabad.</p>	Effectiveness of Module Teaching System on Achievements of Graduate Students in University of Agriculture Faisalabad	<p>Majority (32.5%) of respondents said that teacher encourages the students during the lecture. Teacher tried his best to provide maximum information through this method. In one module class, there were 2-3 or above sections.</p> <p>More than one-fourth (25.8%) of respondents said that it provides an interaction with other students. Students can ask question from teachers and also from other students.</p> <p>Less than one-fourth (23.3%) of respondents said that it introduced the subject in a better way.</p>	<p>There must be proper division of course contents.</p> <p>There must be independent and effective learning through module teaching system.</p> <p>Instructor must be well aware of the module system.</p>

Parallel Session II

Session Chair: Dr. Mian Hamid

Moderator: Ms. Nadia Atif

Venue: Room 4

Time: 10:30am to 12:00pm

Sr.#	Paper Id	Name of Presenter	Title of The Paper	Significant Findings	Significant Recommendations
1	060	<p>Fouzia Ajmal, Assistant Professor, IIUI</p> <p>Prof. Dr. N. B. Jumani, Professor of Education, IIUI</p> <p>Prof. Dr. Samina Malik, Dean Faculty of Social Sciences, International Islamic University Islamabad</p>	<p>Experiences of Prospective Teachers with Problem Based Learning</p>	<p>The respondents were overall satisfied with the curriculum design followed through Problem Based Learning. They were of the view that the curriculum design implemented was activity based, Practical and Psychometric.</p> <p>The prospective teachers were satisfied about facilitation received by teacher.</p> <p>The prospective teachers gained many skills while experiencing problem based learning but sometimes it was difficult for them to explore material independently and then bringing it in our group.</p> <p>The learners told that as they progressed through the semester with PBL, they developed some skills and confidence and became comfortable with this method.</p>	<p>As prospective teachers had good and valuable experience of the course through problem, Based Learning so it is recommended that it may be utilized in all teacher education programs for the subject of educational research.</p>

2	072	<p>Fazal Hakim, PhD Scholar, IIU Islamabad,</p> <p>Tariq Mehmood, PhD Scholar, IIU Islamabad,</p> <p>Sahib Zada Waqar Ahmad, PhD Scholar, IIU Islamabad</p>	<p>Influential Role of Semantic Mapping in Developing Vocabulary of the Students at Secondary Level in the Subject of English</p>	<p>Semantic mapping method is more effective than the traditional method (Lecture method).</p> <p>Semantic mapping group surpassed the traditionally taught students with respect to high, average and low achievers.</p> <p>Semantic mapping enhances vocabulary with greater speed and functionality than the traditional method.</p> <p>The average and low achiever get more benefit as they showed significant improvement in their reading comprehension via semantic mapping than their counterparts in traditional method group.</p>	<p>The teachers may implement the semantic mapping method to increase the vocabulary of the students in the subject of English.</p> <p>On the bases of the results shown by the research, the concerned authorities are recommended to provide teachers especially at school level, with proper training, guidance and motivation to use semantic mapping method wherever feasible</p>
3	032	<p>Sidra Munir</p> <p>Dr. Fouzia Younis Fatima Jinnah Women University, Rawalpindi</p>	<p>Perspective of Government School Teachers Towards Higher Education</p>	<p>Comparison between male and female describe that Male teachers have more positive perspective then female teachers.</p> <p>Mostly teachers get higher education for enhancing self-confidence, personal development, passion, sense of competition, bring up children, inspiring others and for enhancing their post, learning new technology.</p>	<p>It may be conducted on private or F.G schools Rawalpindi as well as in other cities and villages of Pakistan.</p> <p>In-service education may be organized especially for the benefits of teachers who cannot be covered in the contract programmes and government utilizes money for them.</p>

4	152	<p>Sadia Dilshad, PhD scholar Department of Education</p> <p>Prof.Dr Dr. Samina Malik Dean, Faculty of Social Sciences International Islamic University Islamabad</p>	<p>Active Learning Strategies and their Use In Teaching Learning Process in IIUI</p>	<p>The use of active learning strategies creates motivation, deep-learning and higher level of thinking of subject matter, but if the teachers creates conducive, active and competitive learning environment, then it can be proven more practical and effective.</p> <p>Faculty members reported that they often use brain storming, interactive lectures, and group discussions along with group working, question-answer and assignments which are frequently being used by the teachers of IIUI but they do not use pair-share, role playing, case study, and active review secessions on regular bases. Rather these are never used in their class rooms.</p>	<p>It is recommended that teachers should not only use all techniques of active learning in the class but should adapt the method by dividing the whole course outline according to the techniques to make learning long lasting and fun.</p> <p>It is also recommended that although some techniques like learning through pair-share, role playing, case study, are difficult to use in all of the subjects included in social sciences but a teacher must be acquainted with the techniques so that he /she can make use of rather more functional techniques like demonstration, debates, discussions.</p>
5	223	<p>Alina Raza, Teaching/Research Associate, Department of Education, International Islamic University Islamabad</p>	<p>Developing Multiple Intelligence Profiles of Prospective Teachers: A Need Analysis for Creating an Active Learning Environment</p>	<p>The experiment affirms that the students' categorization into various groups i.e. naturalist, musical, logical-mathematical, existential, inter-personal, bodily-kinesthetic, linguistic, intra-personal and spatial intelligence does provide an opportunity of self-reflection, better understanding about their needs and interests.</p>	<p>It is recommended that MI profiles may be utilized effectively in achieving the course objectives as well syllabus designing and curriculum planning.</p> <p>However, it requires more efforts, planning, facilities and training to design and organize activities in creating an active classroom environment for students.</p>

				Developing MI profiles of the prospective teachers presented a clear picture to analyze their needs and requirements. It also helped in designing instructional strategies to provide an experience of active learning environment.	
6	154	Dr. Munazza Mahmood, Assistant Professor, Department of Education International Islamic University Islamabad Memoona Bibi PhD Scholar, IIUI	Internationalization of Higher Education; Analysis of The Challenges Faced By International Students at IIUI	Higher education is a challenging experience for students of all backgrounds and the transition is deemed not easy and presents many difficulties. The findings illustrated the importance of a strong support system for the international students, since these students have special needs and many more concerns than their fellows. It was noted that the students wished they received more information about housing, academic programs, job opportunities, culture, and language prior to starting their journey at Rowan University. Hence, the orientation can play a great role in introducing the international students to the institution and to the different programs offered.	Provide multicultural activities on campus to raise awareness about international students' needs. Conduct periodic surveys to assess the experience of international students. Invest more time on the orientation to cover broader topics and concerns related to international students.

Parallel Session II

Session Chair: Dr. Ishrat Siddiqua Lodhi

Moderator: Sehrish Javed

Venue: Room 5

Time: 10:30am to 12:00pm

1	161	<p>Humera Perveen, Student MPhil Education, PMAS Arid Agriculture University Rawalpindi.</p> <p>Dr. Muhmmad Arshad Dahar, Assistant Professor Education ,PMAS Arid Agricultural University Rawalpindi</p>	<p>Factors Affecting Learning Arabic As A Second Language</p>	<p>Attitude of parent’s society, students, teacher and family all affects students’ second language learning ability.</p> <p>When they positively affects students perform better but when negatively affects students lose their interest in learning. Motivation is important for learning second language 67 % students were disagreed from the statement that their families motivate them to learn Arabic language.</p> <p>Students were disagreed that classroom environment is friendly for learning Arabic language. 69 % students were agreed that classroom is better place than home to learn Arabic language as second language. Brown (1994) does not supports the study’s result. Ellis</p>	<p>Parents should guide their children to learn Arabic language. Community negatively affects Arabic language learning. Teachers and parents should adopt positive attitude toward Arabic language learning so that they can perform better in language learning.</p> <p>Teachers should use different teaching methods for teaching Arabic language for better result they should make their classroom environment interesting and happy so that they can learn equal to other students because classroom is better place for students to learn Arabic language.</p>

				(1994), Neiman (1978) & Abraham 1985 supported the statement that old teaching methods and strategies affect Arabic language learning.	
2	189	Sadia Parveen Qureshi, MPhil, Scholar Educational Planning, Policy Studies and Leadership, AIOU	Internationalization Of Education By Academic Entrepreneurship; Pakistani Context	This survey <i>concludes</i> that there is very significant relation is found between internationalization of education and multiple challenges regarding acquiring academic entrepreneurship/entrepreneurial skill development.	So this study <i>recommends</i> that there need of having more effective and efficient marketing measures, industry-university linkages and sound educational policies in terms of embedding international entrepreneurship dimensions in undergraduate and postgraduate social sciences /business programmes at university.
3	209	Dr. Muhammad Tahir, Visiting Assistant Professor NUML & International Islamic University, Islamabad	Internationalization of Islamic Education at University Level: Challenges, Impacts and Solutions	The paper concludes that Islamic education curriculum and approach in Muslim world differ from Western world, which creates a gap to be addressed at international level for university students.	The research findings recommend that an integrated approach is needed to deal with current challenges to internationalization of Islamic education.

4	098	<p>Saiqa Andleeb, M. Phil Scholar, Department of Education University of Sargodha</p> <p>Prof. Dr. Nargis Abbas Mirza, Assistant Professor Department of Education University of Sargodha</p> <p>Abida Parveen , PhD Scholar Department of Education University of Sargodha</p>	<p>Impact of Parents' Profession on the Competencies of University Graduates: A Student Perspective</p>	<p>With the help of results we concluded that higher education developed competencies among graduates (68.5%) however the level of competencies also affected by other variables. Such as parents profession and qualification also affected on graduates competence level.</p>	
5	110	<p>Shumaila Haleem, PhD English (Literature) Student, National University of Modern Languages, Islamabad</p>	<p>Internationalization of Education: Challenges for Teachers and Solutions</p>	<p>Internationalization of education has many advantages and disadvantages. At one hand it makes educational process collaborative and on the other hand it creates many problems for the teachers. These problems can be resolved by the teachers by adopting various strategies. Teachers can be trained in this regard to meet the challenges of the internationalization.</p>	

Parallel Session II

Session Chair: Dr. Asia Zulfiqar

Moderator: Ms. Fatima M. Qasim

Venue: Room 7

Time: 10:30am to 12:00pm

Sr.#	Paper ID	Name of Presenter	Title of the Paper	Significant Findings	Significant Recommendations
1	103	<p>Khan Raziq, PhD (Education) Scholar International Islamic University, Islamabad,</p> <p>Shaheen Ashraf Tahirkheli, Research Associate Allama Iqbal Open University, Islamabad</p>	<p>Administrative Lapses of Primary Education in District Peshawar</p>	<p>It was investigated that low salary package, lack of standard procedure of recruiting of heads and the absence of boundary walls of the schools were causes of poor administration of primary education.</p> <p>Provincial government, despite all its efforts, did not achieve the target of effective administration at primary school due lack of power, skills, pre-service training, leadership qualities of the administration of primary schools.</p>	<p>This study explored many forms and causes of administrative lapses at primary level education the stakeholders should take steps to minimize the effects of these causes on administration.</p> <p>As this study was limited to the boys schools heads and only to district Peshawar so it may be expanded to girls schools heads and other demographic areas to make the study more authentic</p>

2	033	<p>Dr. Wajeaha Aurangzeb, Assistant Professor Education QEC, NUML, Islamabad</p> <p>Dr Naveed Akhtar, Associate Professor Director QECNUML, Islamabad</p>	<p>E-Leadership in 21st Century: Reframing Higher Education Institutions through Enrichment of E-Leadership Processes</p>	<p>The importance of ICT integration for leaders today is generally accepted as a truism. For example, respondents agreed to it that global trends indicate the use of e-leadership to create virtual as well as face to face environments. Yet, progress in e-leadership research has been surprisingly modest. This study focused on technology adoption by leaders related to higher education institutions. While leader adoption of ICT technology behaviours for personal use is not the only aspect of e-leadership, it is a vital one. Leaders, slow or resistant to adopt technology, are less likely to have the range of ICTs needed to be up-to-date and effective. Further, strong adoption practices are more likely to lead to a better understanding of the features, benefits and challenges of ICT incorporation for leadership.</p>	<p>It is recommended that enhancing technology mediated management skills of educational leaders, developing educational leaders' virtual communicative skills through training and development, exposing them towards global trends and creating connectedness with other educational leaders through extensive use and exposure of Information and Communication Technologies may help in reframing organizations through enrichment of e-leadership skills and competencies.</p>

Very few School teachers guide students to choose the subject according to their abilities. Most of the students were not guided at school level.</p>	<p>The Government may appoint a counselor in a school to guide the students regarding their career.</p> <p>School administration may provide necessary information to students and parents about subject options and career choices</p>

Parallel Session III

Session Chair: Dr. Mian Hamid

Moderator: Ms. Sehrish Tariq

Venue: Room 4

Time: 12:00pm to 1:30pm

Sr.#	Paper ID	Name of Presenter	Title of the Paper	Significant Findings	Significant Recommendations
1	084	Farah Latif Naz, Lecturer, Department of Education Dr. Khalid Khurshid, Chairman/ Associate Professor Mohammad Kashif, Department of Education Mohammad Shahbaz, Department of Education, Bahauddin Zakariya University, Multan, Pakistan	Moral Effects of Social Media on Students Value System In Pakistan	Results shows that the social media causes emotional disturbance between family members. Due to the excess use of social media student not participate in the family matters. Although social media become a way of communication between old and new friends and connect them but these medias like Facebook, Twitter, Instagram, whatsApp and many other social sites develop the negative attitude among the student. Excess use of social media badly effect on their academic performance, and social media also cause the early maturity among the students. Moreover social media harmfully effect on the value system of student. Western thoughts and culture of affect	The present study only focused on students of public sector universities, it is suggested that further researchers may conduct comparative studies between public sector and private sector university students. The universities should be conducted value oriented seminars and workshops for teachers and students. Department wise competition should be conducted on different cultural themes for the promotion of our cultural values. Teachers should also convey value oriented thoughts in the class room (in the end or start of the lecture), so students can identify between the right and wrong use of media in their life.

				the morals of students. Social and domestic morality of students go down due to the excess use of prohibited sits. These sites distract students from their studies and social norms. Use of social media effects on student health and cause anxiety. Excessive use of different sites without any knowledge create social unrest among youth and they suffered many physiological issues before their age and level.	
2	093	Fiza, Research Scholar. Sana Hameed, PhD Scholar, Azeem Sabir, PhD Scholar (Education), International Islamic University Islamabad	Unveiling the Educational Strategies through Social Media: Facebook As A “Surveillance” of Human Renaissance		

3	135	Dr. M. Babar Akram, Assistant Professor, Department of Sociology, International Islamic University, Islamabad, Zaheer Abbas, PhD Scholar, Department of Sociology, International Islamic University, Islamabad, Pakistan	Exploring the Use of Social Media and Youth Academic Performance in Pakistan	Use of social network is directly affect the academic progress of the students. The authors conclude that it is not so much the Internet that causes these problems as the new social opportunities of the Internet. Students who reported academic problems were more likely to use the Internet for real-time social activities such as IM and chat rooms. The findings of the paper can be used to propose the effective plans for improving the academic performance of the students in such a way that a balance in the leisure, information exchange and academic performance can be maintained.	The study confirmed that use of social media was inversely related to the academic performance of the children. In the light of these findings, there is a need of engaging youth with their educational environment in order to develop bright future
4	208	Qurat Ul Ain, MS Education Scholar, International Islamic University Islamabad Dr Shamsa Aziz, Associate Professor International Islamic University Islamabad	An Analysis on the Role of Social Media on Student's Achievement at University Level in Islamabad	Most of the students agreed that social media has a role in student's academic achievement. By using social media their learning becomes easier. Students share their information to their class fellows and their teachers as well.	Students might set time for social media and also use it for academics purpose as much as possible. Excessive use of social media also affects book reading habit of students they might use full spelling while using social media rather than short form and they might be build habit of book reading.

				Usage of social media had affected students spelling when writing examination. Excessive use of social media also affects book reading habit of students. Student use social media for assignment and other study materials sharing. Social is not a tool to improve GPA in studies rather a tool to share knowledge.	
5	016	Muqaddas Inayat Lecturer, English NUML, Islamabad	Media Helps in Reinforcing Gender Ideologies: Discourse Analysis, a Changing Perspective	<p>Content analysis of the cartoon movie Toy Story 3 shows that the way women are oppressed in society, similarly they are oppressed in the Cartoon Movie.</p> <p>It is found that women is negatively portrayed by male writing, it is just to oppress the women. They are shown in two categories good or bad. Those who are the supporters of hero are shown as good girls and those who use their mind to answer the hero shown as bad girls.</p> <p>Throughout the movie it is seen that the active and professional</p>	<p>No one has done research about the gender ideologies in a cartoon movie Toy Story 3 by applying feministic theory. So, this result opens the ways for the new researchers to look over this genre with Marxist perspective.</p> <p>The new researchers can do research in different games and see how games help in creating gender roles.</p>

				roles are given to men. They contribute for the development of the country on the other hand women are shown as weak, subordinate and in passive characters.	
6	079	<p>Fatima Batool, PhD Scholar, Department of Education</p> <p>Prof. Dr. Samina Malik, Dean, Faculty of Social Sciences, IIUI</p>	<p>Guidance and Counseling for Students: A Need Assessment</p>	<p>Majority of the students (58%) were agreed that they need educational guidance and counseling and cumulative mean score for educational guidance was 17.76</p> <p>Majority of the students (61%) were agreed that they need vocational guidance and counseling and cumulative mean score for vocational guidance and counseling was 18.36</p> <p>Majority of the students (58%) were agreed that they need social guidance and counseling and cumulative mean score for social guidance and counseling was 25.41</p> <p>Majority of the students (53%) were agreed that they need personal guidance and counseling and cumulative mean score for personal guidance and counseling was 17.34</p>	<p>HEC may take initiative to ensure the availability of guidance and counseling services for supporting students. Expert counselors/professional related to fields of Medical, Sociology, Education, Psychology and Entrepreneurship may be hired</p>

The local leaders may be trained and empowered for fiscal decisions.</p>

3	097	Dr. Shahid Mughal, Associate Professor Sukkur Iba University, Department of Education	Integration of Education for Sustainable Development Themes in School Education: Opportunities and Challenges	ESD themes can be integrated from university to schools curriculum. For the promotion of sustainable practices in schools, several steps could be used such as the promotion of recycling and waste management practices, campaign for the conservation of water and energy resources among children. Such steps are used to develop critical thinking skills of children in assessing environmental problems and develop their skills to become the critical consumer of the environment.	The present situation call for to develop teacher educators, textbook writers' teachers' knowledge and skills in promoting ESD themes at the school level. There is a need to review National Conservation Strategy (NCS) of Pakistan for better results.
4	133	Dr. Gulzar Ahmed, Assistant Professor Department of Education, The University of Lahore, Pakpattan Dr. Nabi Bux Jumani, Professor, Ex. Dean Faculty of Social Sciences, IIUI Parveen Munshi, Professor, Vice Chancellor, University of Sufism and Modern	Technological Innovations and its Impact on Education	It was found that technological innovations have positive impact on improving teaching and learning skill of teachers and students. It was also found that teachers and students were facing many problems while using technological innovations during and after classes, which have direct impact on improving their academic performance.	The study recommended that special computer training courses of short duration for teachers and students must be organized to update them regarding latest developments of computer technology.

		Sciences, Bhittshah/Hyderabad, Sindh		It was concluded that despite of problems faced both teachers and students, technological innovations have positive impact on teaching and learning process.	
5	231	Faiza Ashraf Department of Sociology Mohsin Ashraf Government College Women University Sialkot	The Impact of Texting (SMS) on Students Academic Writing	As the results show that many students fell difficulty in writing English and they often make spelling mistakes due to the SMS using habit that is also directly proportional to the excessive use of SMS. Student mostly do not use punctuation in formal writing and that is a big trouble. All efforts must therefore be made to help students write good English whether on phone on paper and in formal work. The findings of the study indicated that majority of respondents perceived that texting(SMS) have a great impact on students' academic writing performance.	It is government responsibility to provide a free training and seminars to stop students to the use of texting (SMS) in their formal writing. If we add this research in the educational policies then we will definitely stop student to use of SMS in their assignments, as well as examination. Students expect someone to fix their misspellings in class because they are used to their autocorrect doing it on their phones.

6	233	Dr. Shamsa Aziz, Chairperson Department of Education International Islamic University, Islamabad Sobia Khurshid, MS (Scholar)International Islamic University, Islamabad	The Study of Technology Innovation and its Impact on Higher Education	Technology innovation is combination of potential and creativity. ICT is a key driver in education. ICT provide long lasting, conducive learning environment. It is easy access to E-books to obtain information. Majority of students (78%) were agreed that technology produce competitive and global students at university level. There are many technologies available to help us do our work better, and the learning academies help faculty became comfortable using them so that they can best meet student expectations.	Campus IT organizations, centers for teaching and learning, and other campus units that support the faculty in a variety of ways have the infrastructure and resources to help in these efforts. The Staff continues to innovate by newer innovations in technology.

Closing Ceremony

The closing ceremony of the two day international conference on innovation in teaching and learning held at Faisal Masjid campus of the International Islamic University Islamabad on Thursday October 18, 2018. Following speakers addressed in the closing ceremony:

- Chief Guest Mr. Ali Nawaz Awan Member National Assembly
- Chief Guest Ms. Nafeesa Khattak Member National Assembly
- Worthy President International Islamic University Islamabad, Prof. Dr. Ahmad Yousaf al Draiveesh
- Guest of Honour Mr. Ch. Munir Ahmad former Joint Secretary
- Mr. Fida Hussain Director General Learning Innovation Division Higher Education Commission Islamabad
- Dean Faculty of Social Sciences, Prof. Dr. Samina Malik,
- Patron of conference and Director Directorate of Distance Education Prof. Dr. Nabi Bux Jumani

Participants of a two day international conference on innovation in teaching and learning have recommended prioritizing education and updating curriculum as per advancements of the hour. They also called for a meaningful linkage between academia and policy makers.

Mr. Ali Nawaz Awan Member National Assembly in his speech said “Human development is basic need of every society because it guarantees health and educational prerogatives of an individual”. He stressed that education must be prioritized and told that government was keen to work with academia to come with better solutions to the problems.

Ms. Nafeesa Khattak Member National Assembly called for a well updated, advanced and innovative curriculum. She also hailed IIUI for its services and highlighted disused opportunities for youth to excel in the field of education.

Ch. Muhammad Munir, former Joint Secretary education stressed upon spending more and more on education. He said that the sector was being neglected and suggested that special training courses for teachers be launched. He also urged for a meaningful linkage between policy makers and academia.

Mr. Fida Hussain Director General Learning Innovation Division Higher Education Commission Islamabad acknowledged the contribution of the department of education for improving the status of education in Pakistan. He also highlighted the initiatives taken by HEC for quality education and teacher training in Pakistan and said that such events should be organized to develop a learning community and research culture in Pakistan.

Prof. Dr. Nabi Bux Jumani, the patron of the conference and director distance learning presented the conference report and concluded the major ideas and arguments which were presented in this conference.

Explaining about the importance of taking the initiative of the conference Dr. Jumani said that the Department of Education, Faculty of Social Sciences, International

Islamic University Islamabad in collaboration with Higher Education Commission, Pakistan has executed second International Conference on Innovation in Teaching and Learning (ICITL-2018). This conference's sessions aimed at addressing the many opportunities as well as challenges, and current and future directions afforded by technological innovations in the field of education. New innovations allowing broader access to education at a global level, as well as innovations in how teaching and learning can occur, demand that traditional theories and views on how learning is designed and delivered, but also educational policies at the institution or state level, be reassessed, adjusted, modified, repurposed, and perhaps even replaced.

Talking about the major themes of conference he said that the selected papers were in the areas of Learning and Teaching for Sustainable Development, Innovations in Curriculum and Instruction, Professional Insertion, Teaching and Learning in a Digital World, Student's support system in 21st century, Leadership in the 21st century, Educational Interventions, Social Media and Education, Innovations in Distance Education and E-Learning, Blended Learning, Higher Education, Educational Research, Mathematics and Science Education, evaluation/assessment techniques, educational pedagogies/strategies and Internationalization of education, Technology innovations and its impact on education.

Highlighting the contribution of national and international keynote speakers in this conference he said that the keynote speakers included eminent professors from different countries having diverse experience in the field of education including Dr. Martin Valcke Ghent University Department of Educational Studies Gent Belgium, Prof. Dr. Bill Atweh Visiting Professor Philippines Normal University and Adjunct Professor Curtin University, Australia, Prof. Dr. Sarah Younie, De Mountfort University UK, and David J. Roof, Ball State University USA.

The national invited speakers included Prof. Dr. Parveen Munshi Vice Chancellor University of Sufism & Modern Sciences, Bhattshah, Sindh, Prof. Dr. Riaz-Ul-Haq Tariq Chairperson NACTE, Prof. Dr. Mehmood-ul-Hasan Butt Advisor, HEC, Islamabad, Prof. Dr. Munawwar S. Mirza, Ex-Chairperson NACTE, Prof. Dr. Razaqat Ali Akbar Director Institute of Education and Research, University of the Punjab, Professor Dr. Muhammad Khan Professor of Politics and International Relations-IIUI, Prof. Dr. Muhammad Ramzan Dean, Faculty of Social Sciences and Humanities, Karakoram International University, Prof. Dr. Arshad Ali, IER, University of Peshawar, Dr. Waheed Noor Director DDE, University of Balochistan, Prof. Dr. Saeed Mahr, IER, University of the Punjab.

Total 237 abstracts were received for the conference and 207 abstracts were accepted while 173 papers were presented in parallel sessions in the 2 days.

Dr. Jumani explained that we had international paper presenters from Faculty of Industrial Management, University Malaysia Pahang and Imam Abdul Rahman Bin Faisal University Dammam, Saudi Arabia. From Pakistan we have presenters from Abdul Wali Khan University Mardan, Aga Khan University Institute for Educational Development, Air University Islamabad, Allama Iqbal Open University, Islamabad and Bahawalpur, Bahauddin Zakariya University, Multan, Comsats University, Islamabad, Imperial College of Business Studies, Lahore, Department of Higher Education, Khyber Pakhtunkhwa – Pakistan, Education Department, Government of Punjab, Fatima Jinnah Women University Rawalpindi, FG Public School No 2

Stressing upon the participation in this international conference he said that around 800 academicians and researchers from various educational/research institutions of Pakistan and abroad attended the conference. This conference has met the expectations of the academic community and has provided networking opportunity for them.

Talking about the importance of development of education in 21st century he said that in 21st century we are witnessing a significant transformation in the development of education with the new science and technological development. The impact of globalization on very field of human life and acceleration of technological developments and global markets, and the need for flexibility are essential challenging elements of this process which have to be tackled by all levels of education. To tackle these challenges the education sector has to find innovative ways to quickly respond to them.

Presenting the recommendations of the conference Dr. Jumani said that academicians have a greater responsibility to pursue excellence in several directions including leadership, development of curriculum, developing various skills, academic management, teaching skills, pursuing scholarships, research and knowledge exchange and many more. The need to adopt international practices and paradigm shift from teacher centered teaching to the active involvement of teachers and students towards students' continuous learning process were stressed. Through utilizing innovative ideas in teaching and learning translating the capacity of the vision into

reality was recommended. The sessions emphasized to create conducive, active and competitive learning environment to make the transformative and innovative strategies more applicable.

In conclusion he said “Dear audience, as you can see, this conference remained very interactive and the practical solutions related to innovations are brought forward. The research scholars, faculty members and academia can apply these innovative strategies and methodologies during instruction in order to make learning experiential rather theoretical”.

Prof. Dr. Ahmad Yousaf al Draiveesh, Worthy President International Islamic University Islamabad, appreciated the initiative of the Department of Education to organize this kind of mega event and stressed upon the importance of innovations in teaching and learning in higher education. He said that this conference has provided an excellent opportunity to all intellectuals to discuss the challenges and prospects of education in Pakistan. He conveyed heartiest congratulations to the organizing committee for arranging such a unique conference

Prof. Dr. Samina Malik, Dean Faculty of Social Sciences paid a vote of thanks to all the participants, organizing committee of the conference and apprised the services and achievements of the departments. The ceremony was also attended by Vice Presidents, senior faculty member of the department and a large numbers of the students.

At the end university insignia was presented to the chief guest of the ceremony and worthy president IIUI and Organizing committee has also received shields as an acknowledgment of their achievement.
