Sample Test Paper For Admission In MS Biosciences

Q.1 Plant like photosynthesis that releases O₂ occurs in the

- (a) cyanobacteria
- (b) chlymydias
- (c) archeas
- (d) actinomycetes

Q.2 which of the following mechanisms is known as the cut and patch mechanism?

- (a) Photoreactivation
- (b) Nucleotide excision repair
- (c) Base excision repair
- (d) Mismatch repair

Q.3 The immediate product of meiosis in plant is

- (a) spore
- (b) zygote
- (c) gamete
- (d) sporophyte

Q.4 The following is end products of anaerobic respiration

- (a) Mater
- (b) Alcohol
- (c) Lactic acid
- (d) CO₂

Q.5 The process of trading glucose for ATP is called

- (a) Glycolysis
- (b) Krebs cycle
- (c) Cellular respiration
- (d) Glycogenesis
